• Optional cloud video recording when sound/motion is detected

Easy, safe and secure
• Easy set-up of monitor via QR code
• Video encrypted for secure connection
• Powered by iVideon, a leading firm in video cloud solutions

PHILIPS

Highlights

Wi-Fi enabled

The In.Sight wireless monitor is a Wi-Fi enabled monitor, it uses your home wireless network to stream live video and audio with monitor that you can set up anywhere you like.

Night vision mode

Infrared night vision mode allows you to watch your home even in the dark. When it's dark, infrared light goes on for the monitor to capture clear black and white video. Night vision mode switches on and off automatically, or you can adjust it manually.

Extra-wide angle lens

Philips In.Sight wireless HD home monitor M120, boasts a viewing angle of 102 degrees that shows you more of the room at once, letting you see a lot more than other monitors.

Push to talk

With the In.Sight monitor, not only can you keep an eye on your home, but also talk to your loved ones . Simply press "talk" on your iPhone/iPad and communicate at once. What a great way to say hello!

Motion/sound notifications

It's impossible to predict when something might happen. In.Sight keeps watching with adjustable motion and sound detection. You will be notified automatically when sound or motion is detected.

Easy set-up via QR code

Set-up is simple with the In.Sight+ app. The app will generate a QR code for your home Wi-Fi settings. With the QR code, the monitor will automatically pair with your Wi-Fi network, easily and instantly.
