Component micro sound  
system

Dock for iPod  
DAB

DCB152

## Obsessed with sound

Sound system to relax with great music

Relax to iPod music in superb sound. The Philips component micro sound system also charges your iPod while it plays. With built-in clear and crackle-free DAB radio and 40 watts of power, it offers a complete sound experience.

### Enjoy your music from multiple sources

- DAB for clear and crackle-free radio experience
- Play and charge your iPod simultaneously
- Enjoy MP3/WMA music directly from your portable USB drives
- Play MP3/WMA-CD, CD and CD-RW
- MP3 Link for portable music playback

### Enrich your sound experience

- 2x20W RMS total output power
- Dynamic Bass Boost for deep and dramatic sound
- Digital Sound Control for optimized music style settings

### Easy to use

- Motorized CD loader for convenience access
- Wake up and sleep timer functions
- Radio Data System for station information and data services

**PHILIPS**

# Highlights

## DAB

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear and crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

## Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a

button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

## Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your

music by precisely adjusting the sound balance to match the type of music you are playing.

## USB Direct for MP3/WMA music

Simply plug in your device to the USB port on your Philips Hi-Fi system. Your digital music will be played directly from the device. Now you can share your favorite moments with family and friends.

# Specifications

## Sound

- Output power: 2 x 20 W RMS / 2 x 40 W music power
- Sound enhancement: digital sound control 4 modes, Dynamic Bass Boost
- Volume control: up/down
