

An elderly couple is sitting on a light-colored sofa in a bright, modern living room. The man is wearing a grey sweater and khaki pants, holding a remote control. The woman is wearing a beige sweater and blue jeans. Both are wearing black Philips AudioBoost TV headphones. A large potted plant is visible in the background, and a patterned blanket is draped over the sofa. The overall atmosphere is relaxed and comfortable.

PHILIPS

AudioBoost

For the best TV enjoyment

Philips AudioBoost TV headphones SSC5001/SSC5002

TV sound effortlessly improved

The AudioBoost lightweight wireless TV headphones SSC5001 bring convenience back to your life, letting you hear the TV with renewed clarity and improved volume, without disturbing your family. The AudioBoost TV headphones automatically turn on and off without having to push a button, and automatic RF channel selection gives you the best connection every time.

Comfort assured

Convenient and lightweight, suitable for use with glasses and 3 eartip styles for comfort

Easy to use and set-up

Enjoy extra loud sound with left and right volume controls for personalized experience

Best listening experience

Plug and play design with auto on/off feature and 2 batteries for 10 hours continuous use

Ideal listening experience... always

A digital wireless connection provides a robust, secure and interference free listening experience while also guaranteeing high quality TV sound. Every time you wear the headphones the auto tune function will automatically turn on and choose the best audio channel available for excellent sound quality and the clearest connection.

Listening to headphones does not mean you miss out on family time. A single press on the headphones turns TV sound off and also amplifies the sound around you. This means you can hear voices and ambient sound better, making conversations easier and ensures you never miss a call.

Complete convenience

Simply put them on and they will automatically switch on, and they will automatically switch off when you put them off.

Forget about bad connections as the AudioBoost headphones will always pick the best frequency channel to receive the audio within a range of 50m, without a need to press on a button.

Enjoy better sound whatever your TV. If it has an optical or 3.5mm out connector you will be able to connect, and all the cables you need are included.

Auto on/off switch

Best frequency channel

Fits all TV's, analogue and digital
(included optical cable and 3.5mm TV cable)

Long lasting listening

The AudioBoost TV headphones come with 2 batteries, giving you total 10 hours of listening. When a battery is empty, simply swap it for the other and continue enjoying your shows.

AudioBoost TV headphones charge quickly when docked so they are always ready to use, and the spare battery can be swapped in in seconds if power runs out.

2X batteries

Fast charge adapter

Docking station

High performance sound enjoyment

15mm neodymium drivers deliver clear and loud sound that goes up to 125 dB. This gives you the extra sound you need to enjoy your TV experience.

Not all ears are equal, so left and right ears have their own volume control to create a balanced listening experience that is tailored for your ears. The AudioBoost headphones also come with three EQ sound presets giving you the option to choose the one that fits your TV experience best.

125 dB

Independent L/R volume control

3 X Equalizer settings

Share sound easily

Up to four pairs of Philips AudioBoost headphones can be paired with one transmitter. When the headphones are in use, the TV's speakers can be muted or left on at whatever volume is needed so that seniors can enjoy entertainment without disturbing other people in the room.

Turn off TV sound to enter an ambient mode that uses the mic in the headphones to pick up voices and ambient sound, and amplifies these sounds for clearer conversations with family and a closer connection to the surrounding environment.

4 x headphones can be paired to 1 transmitter

Optional accessories

SSA5BA
Battery
