- Awareness mode
- Adaptive ANC
- ANC (Active Noise Canceling)

Voice assistant

- Voice assistant compatible
- Voice assistant activation: Manual
- Voice assistant support

Highlights

Noise Canceling Pro

Filter out unwanted sounds. You can turn on noise canceling via the neckband controls or the Philips Headphones app. When you need to quickly bring more of the world back in, simply touch and hold the control panel on the right-hand side of the neckband to activate Awareness Mode.

Up to 20 hours play time

No matter what your day holds, these wireless in-ear headphones keep going. Even with noise canceling turned on, you'll get 15 hours of play time. More than enough for every call, podcast, or playlist!

4 mics for clear calls

Four mics guarantee superb call clarity, and sidetone technology lets you hear your own voice for a more natural-sounding conversation. Busy lights let colleagues know you're on a call. Vibrating alerts ensure you won't miss a call coming in, even if the earbuds are around your neck.

IP54 dust/water resistant

Finished a call and need to talk to a colleague? The slender neckband sits comfortably behind your neck, and the magnetic earbuds prevent tangles if you remove them from your ears. IP54 dust and water resistance means these headphones don't mind dust or splashes.

Easy control and pairing

Tap the neckband controls to pause playlists or take calls. Touch and hold the right-hand control panel to activate Awareness Mode. Touch and hold the left panel to wake your phone's voice assistant. These headphones are ready to pair the instant you switch on Bluetooth.

USB dongle

Get a stable connection to your smartphone and laptop-at the same time. Use your headphones to pick up calls on either, and switch between devices as you need. Simply plug the included dongle into your computer's USB-C socket or connect to USB-A sockets via the included adapter.

Detailed sound with good bass

These wireless headphones are Hi-Res Audio Wireless certified. Use a hi-res streaming service and you'll hear every detail of your favorite song, album, or podcast. Perfect for coffee breaks, focusing on a task, or a lunchtime listen!

Philips Headphones app

The Philips Headphones app lets you turn noise cancellation and Awareness Mode on and off. It also features a dedicated equalizer, and you can use the app to control the music you're streaming or access song information.
