- Preloaded relaxation music lets you fall asleep peacefully
- Weekday/weekend alarm setting to complement your lifestyle
- Digital tuning with preset stations for extra convenience
- Gentle wake for a pleasant waking experience
- Repeat alarm for additional snooze

Design that blends into your interior

- Aluminium cabinet for quality look and feel

Easy to use

- Plug and set the time automatically
- Time and alarm backup to wake up on time even with power cut
- Dual alarm to wake you and your partner at different times
- Sleep timer helps you to drop off to your favourite music
- Adjustable display brightness for comfortable viewing

PHILIPS
sense and simplicity

Highlights

Temperature display

Weather information at your fingertips. The Philips Clock radio gives you the most current temperature available. Its smart temperature sensor displays outdoor temperature anytime.

Preloaded relaxation music

Relax or fall asleep to peaceful sounds. The Philips Clock radio is preloaded with a number of pieces of relaxation music. Simply choose from rain showers, ocean waves, spa music and more to enjoy in relaxed comfort.

Weekday/weekend alarm

Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on

weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient feature saves you from the hassle of fiddling with different alarm times every single night.

Gentle wake

Start your day the right way by waking up gently to a gradually increasing alarm volume. Normal alarm sounds with a pre-set volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favourite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

Time and alarm backup

When there is a power failure, this intelligent clock will still maintain its reliable time and your settings. The scheduled alarm remains active even when its display is off - all thanks to a pre-installed battery. When the power comes back on, there is no need to adjust the clock or reinstate settings. More amazingly, even if power supply is not restored, the battery provides enough energy for the buzzer to go off at the alarm time you have set - making sure you never wake up late.
