Highlights

wOOx™ Technology

wOOx technology is a revolutionary loudspeaker concept that allows you to hear and feel profoundly deep bass that is richer than any other audio system. Special speaker drivers work in harmony with the wOOx bass radiator, and precise tuning between the main driver and the tweeter ensures smooth transitions from low-mid to high frequencies. Dual suspension and a totally symmetrical sandwich construction deliver low and precise base without noticeable distortion. wOOx produces exceptionally deep and dynamic bass by using the speaker box full volume to truly magnify the impact of the music.

Radio Data System (RDS)

The Radio Data System (RDS) lets you tune into radio stations without having to remember the frequencies. In standard mode, RDS displays the station name instead of the transmission frequency, facilitating quick and easy tuning. RDS also allows stations to send text messages such as news and station information directly to the radio display. Commonly used in Europe, RDS text is sent out on the same frequency the radio station

broadcasts on. You can choose either the basic RDS display (station name) or subscribe to additional text-based services.

Dome tweeter

Dome tweeters reproduce clear high and mid-range frequencies that enhance the overall sound clarity coming from the speakers. Delivering a harmonious blend of undistorted and uncolored wide-ranging sound, they offer detailed vocal clarity and instruments tone purity, thereby balancing the overall sound when paired with a combination of woofers.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.
