3 out of 6 remote

The controller provides the convenience of controlling 3 out of a choice of 6 home entertainment devices with one remote control. The remote can be easily programmed to control almost any brand of almost all audio/video equipment, using the on-board IR code database. One single remote to operate all your devices, without the hassle of searching for the right remote!

Ergonomic design

The smooth rounded shape fits perfectly in your hand for natural, balanced operation. It looks great too!

Fast key recognition

Fast key recognition helps to quickly and easily correct keys that are not working after installing the brand of your equipment on your remote. Just press the key for 5 seconds while pointing the remote at your device. Once the device reacts, you have fixed the key.

Easy to use grouped functions

Easily grouped functions allow you to easily recognise the buttons you need to control a specific audio video device. All functions of the device are grouped together on the remote. Moreover the top part of the remote is made up of different colour parts (black, silver, aluminium etc.) as well as different key finishings (black, silver, matt, glossy etc.) to quickly identify which keys go together to control a specific audio video device.
