Rich and clear sound

- 5 W RMS total output power
- Bass Reflex Speaker System delivers a powerful, deeper bass

Easy to use

- Dock any iPod/iPhone, even in its case

PHILIPS

Highlights

Weekday/weekend alarm

Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient feature saves you from the hassle of fiddling with different alarm times every single night.

Wake up to your iPod/iPhone/radio

Wake up to your iPod/ iPhone music or radio tunes

Gentle wake

Start your day the right way by waking up gently to a gradually increasing alarm volume. Normal alarm sounds with a pre-set volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favourite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

5 W RMS

This system has 5 W RMS total output power. RMS refers to Root Mean Square, which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determine the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adapters. What's more, it

works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

Digital tuning with presets

Simply tune into the station that you want to preset, then press and hold the preset button to memorise the frequency. With preset radio stations that can be stored, you can quickly access your favourite radio station without having to manually tune the frequencies each time.

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Specifications

iPhone compatibility

- Compatible with: iPhone, iPhone 3G, iPhone 3GS

iPod compatibility

- Compatible with: iPod classic, iPod mini, iPod nano, iPod nano 1st generation, iPod nano 2nd generation, iPod nano 3rd generation, iPod nano 4th generation, iPod nano 5th generation, iPod touch, iPod touch 2nd generation, iPod touch 2nd gen 8/16/32 GB, iPod with colour display, iPod 5th generation
