Operator Requirements

- Name and Caller ID
- Caller ID on call waiting
- Operators services phonebook

Memory Capacity

- Call log entries: 10
- Phonebook: 2 phonebooks of 20 entries

Highlights

Handsfree on Handset

The handsfree speaker phone lets you hold a conversation while your hands are busy with something else and wherever you are. With both the speaker and the microphone in front of the handset, it is just like talking face to face with your correspondent.

Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.

Caller name & number display

The name of the person or company calling is shown on the telephone display. The names of first-time callers can be displayed as well as those that are programmed into the telephone beforehand.

Name and number phonebook

No need to try learning the phone numbers of your friends and family. By assigning a name to a number, you only have to search for the name and the number automatically comes with it.

Paging key

Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.
