# Highlights

## Fill any room with your music

The attractive speaker system looks great in any room of your house so you can enjoy your music out loud instead of on your headphones.

## Dynamic bass boost

Innovative technology delivers unbelievably deep, rich bass from compact speakers. Dynamic bass boost emphasizes the bass content of the music throughout the range of volume settings from low to high – at the touch of a button!

## Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

## Lightweight, portable design

The durable, lightweight material and design mean you can carry the speakers with you wherever you go.

## Mobile phone shielding

Mobile phone shielding technology is an advanced circuitry design that cuts out mobile phone interference to ensure static free sound

## Integrated cable management

Integrated cable management means the product is designed to hold the cords to keep everything neat and organized for travel or storage.
