## CD changer control

CD changer control for non-stop music on the road

## FM/MW stereo tuner

FM/MW stereo tuner

## 4x55W Maximum music power

4x55W Maximum music power

## DSP-Digital signal processing

Advanced digital signal processing technology applied to the entire audio path and it ensures crystal clear sound and pure silence when it is important.

## Subwoofer Out

An output is provided on the rear of the TV to allow you to connect a subwoofer to improve the bass in your TV.

## Digital tuning with presets

Digital tuning with presets

## Electronic Skip Protection

Electronic Skip Protection ensures skip-free music even when your player is subjected to knocks and jolts while you're jogging or on the move. As your CD plays, music is constantly fed into the player's memory buffer, which temporarily stores your music. When the device is subjected to knocks or jolts - accidentally or during sports - you will still experience uninterrupted sound from the music stored in the buffer while the laser promptly refocuses to the point at which the shock occurred, and recommences playing to refill the buffer.
