

Philips Prestigo
Universal remote control

PRESTIGO

SRU9600

See only the keys you need

Made to simplify control of your equipment

Now you can finally put away all your remote controls and replace them with one beautiful controller. The Prestigo SRU9600 can carry out all the functions of your original remotes, and it is also much easier and more convenient to use.

Single control solution for most devices and brands

- 8-in-1 controller for all home entertainment equipment
- Extensive infrared code database for most devices and brands

Great convenience

- Shows only the keys you need on the touch-sensitive display
- Easy access to advanced commands via interactive LCD display
- LCD screen with backlighting for convenience in the dark
- Rotary cursor control for fast menu navigation
- Control multiple devices with a single touch

Quick and easy setup

- No manual needed for setup
- Convenient IR learning from another remote

PHILIPS
sense and simplicity

Specifications

Convenience

- Universal IR database: TV, VCR, DVD, SAT, CABLE, CD/MD, RECEIVER, AMP, PVR, DVB-T, PC, TAPE, TV-DVD, TV-VCR
- Scrollwheel
- Backlight
- Backlight colour: White
- On-Screen Display languages: English, French, German, Spanish, Dutch, Italian

Infrared Capabilities

- Operating distance: 33 ft (10 m)
- Learning IR codes
- Transmitting LEDs: 2

- Number of brands in database: Over 1100
- Carrier frequency range: 30k - 100kHz + 455kHz

Packaging Data

- 12NC: 908210005335
- EAN/UPC/GTIN: 87 10895 91565 6
- Gross weight: 0.35 kg
- Height: 42 mm
- Length: 330 mm
- Width: 162 mm

Power

- Battery saving manager: Auto switch on/off
- Battery type: AA/LR6 Alkaline
- Number of batteries: 3

Highlights

8-in-1 remote control

The universal remote control allows you to program and operate up to 8 devices from almost any brand.

Universal IR code database

A universal IR code database refers to a library of infrared codes built in to a particular remote. This feature allows a remote to control your equipment without needing to learn individual signals. Select the correct infrared code sets in the database for the devices you want to control to enable control of virtually every audio/video system element on the market today – regardless of model or brand.

Touch-sensitive display

Through the special inverted segmented display technology, only those keys that are needed to control a specific device are lit up. No need to look for the right buttons anymore.

Interactive LCD display

The interactive LCD is a 4-line dot matrix LCD display that guides you through the settings, as well as the different devices.

Backlight on screen

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting are LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green colour, while EL panels are smooth with blue, white or green shades.

Intuitive rotary cursor

A cursor incorporating a rotary wheel enables you to navigate through the setup menu and the device pages, in both clockwise and anti-clockwise directions.

One-touch convenience

One-touch control allows you to perform multiple commands with one press of a button via a macro. A macro combines a string of pre-programmed commands under one single button. Therefore, it simply takes one button press to execute a series of functions.

Guided setup

Unlike other universal remote controls, where a 3-digit code needs to be input to identify a brand and device, this remote incorporates on-device step-by-step instructions for setting up your equipment, regardless of brand.

Learning functionality

Learning functionality refers to the process through which a remote control captures and stores infrared signals from other remotes for later use. When device codes are not included in the on-board database, they can always be learned from the original remote, simply by pointing to it.
