- Integrated antenna on handset and base
- Up to 50 m maximum indoor range¹
- Up to 350 m maximum outdoor range¹

1 - The quoted range is under ideal conditions, i.e. with no obstacles between the base and handset. The range of DECT cordless telephones depends on :

- the environment in which the base station is located : thick walls, metallic window frames etc. near the base will reduce the phones' range
- the presence of obstacles between the base station and handset : for example, when using a handset in the garden with the base station inside the house, the range may be reduced by the exterior wall of the house.

2 - Network dependent

Base features :

- Full duplex handsfree
- Direct access to Do-not-Disturb function
- Do-not-Disturb LED
- Full dialling keypad
- Paging function
- Loudspeaker volume controls
- Adjustable base ringer volume
- Recordable melody
