Share your memories

How many digital pictures are hidden on your PC? See, share, organize and relive your memories with Philips PhotoFrame™, the easiest way to share your memories by displaying your digital photos in stunning quality - without a PC.

Top quality display for print-like pictures
- High pixel density for sharp and detailed photo display
- imagen for sharp and vibrant color
- 4:3 aspect ratio for optimal distortion-free display
- Add new glow to old memories with RadiantColor

Easily display and manage your digital photos
- Have fun with collages: display mutiple photos in one view
- Play slideshows, single photo, thumbnails or show clock

Simple intuitive operation and great convenience
- Auto photo orientation to fit portrait or landscape modes

Green design
- Auto on/off display at pre-set times for power saving

Stylish and curve design complements your photos
- Tasteful glossy finishing and great touch feeling

PHILIPS

sense **and** simplicity

Highlights

High Pixel Density Display
The very best high density screen shows off your treasured photos with the same 'real life' rich detail and vibrant colors as high quality prints.

imagen technology
imagen is exclusive Philips photo enhancement technology that automatically analyzes your photos to correct color and adjust for optimal contrast: imagen separates colors to avoid "crosstalk" adjusts brightness distribution for great visual contrast and corrects Gamma for color accuracy.

4:3 perfect frame ratio
Philips digital PhotoFrame ensures your photo to be displayed in 4:3 ratio for the best viewing experience.

RadiantColor
RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the color on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.

Multiple-photo collage effect
It's a slideshow effect to show photos in collage form that automatically and randomly compiles different photos together to avoid unattractive borders that may result from photos which are smaller than the screen size.

Multiple viewing modes
Flexible display modes give you the freedom to display your photos one image at a time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.

Auto on/off display
A timer turns PhotoFrame on and off at the hours you select, reducing energy consumption for the sake of our environment saving up to one third of your PhotoFrame energy costs.

Auto orientation
Automatic landscape/portrait recognition employs a sensor that recognizes PhotoFrame orientation and displays each photo in its proper mode.
