- Packaging type: Dummy

Highlights

Pre-programmed for Philips

If you have Philips equipment, you can use your universal remote control without programming it because all keys are pre-set for Philips.

Auto brand search

Getting your new remote control working is simply a case of having your remote automatically search for the most suitable code for your equipment.

Directly access your favorites

This remote has four favorite channels keys, which you can change to your favourite channel icon keys. Simply remove the ring around the favorite channel key, take off the transparent cover, and replace the sticker with the channel icon of your favorite channel (out of the 150 stickers available). Now you can select your favorite channels directly.

Learning favorite keys

To have your 5 favorite functions of your original remote available you can copy the signal transmitted from the original remote. If these are your/or your kids favorite channels you can even lock the remote to see any of the other channels.

Online URC service

Dedicated support service for your remote control whereby all codes for all brands, are available via the Philips URC website.
