

#### Cordless phone

- 1.6" display/ amber backlight
- 2 handsets

D1402B/90

## Keep it simple

The Philips D140 Cordless Phone has all the essential functions you need. Just plug and play to enjoy calls. And with micro-USB charging, the D140 can run on a power bank, so you can keep talking even if the power cuts out.

#### Benefits

##### Nice and simple

- Easy to read 4.1 cm (1.6") display with backlight
- Caller ID – so you always know who is calling\*
- Ultimate convenience through easy setup
- Textured back cover for non-slip grip
- Up to 10 hours talk time on a single charge
- Stay connected during power cuts via micro-USB power bank

##### Crystal clear sound

- Advanced sound testing & tuning for superb voice quality
- Automatic Volume Control offsets unwanted volume variation
- Optimized antenna layout for great reception in any room
- Parametric Equalizer delivers pure and clear sound

##### Eco-conscious product

- Low radiation and power consumption

# PHILIPS

## Features

### 4.1cm (1.6") display

### Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.

### Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

### Caller ID\*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

### Easy setup

Ultimate convenience through easy set up. Simplified installation - Plug & Play product

### Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

### Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

### Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

### Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

### Up to 10 hours talk time

### Micro-USB connector

The integrated micro-USB connector socket on the base unit ensures that the phone can stay powered via a pre-charged power bank, allowing you to make calls even if the power cuts out. The power bank charging feature supports most power bank products with which are able to provide a minimum output current below 85mA without automatic shutdown. Power bank sold separately.

## Specifications
