Mains plug

This apparatus is fitted with an approved 13 Amp plug. To change a fuse in this type of plug proceed as follows:

1 Remove fuse cover and fuse.

2 Fix new fuse which should be a BS1362 5 Amp, A.S.T.A. or BSI approved type.

3 Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place.
If the mains plug contains a fuse, this should have a value of 5 Amp. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5 Amp.

Note: The severed plug must be disposed of to avoid a possible shock hazard should it be inserted into a 13 Amp socket elsewhere.

How to connect a plug

The wires in the mains lead are coloured with the following code: blue = neutral (N), brown = live (L).

As these colours may not correspond with the colour markings identifying the terminals in your plug, proceed as follows:
– Connect the blue wire to the terminal marked N or coloured black.
– Connect the brown wire to the terminal marked L or coloured red.
– Do not connect either wire to the earth terminal in the plug, marked E (or ⊥) or coloured green (or green and yellow).

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the two wires.

Dear Customer,

Thank you for buying the Philips MP3-CD Soundmachine. Your great new acquisition will allow you to listen to up to 10 hours of CD-like quality music, using the revolutionary new music compression technology MP3.

MP3 technology
MP3 is short for MPEG1 Layer-3 encoding and decoding technology, a very powerful encoding algorithm with which you can shrink down the orginal digital audio sound data with a factor of up to 10 without losing significant sound quality.

Recording and Playback
It is recommended to set your recording bit rate to 128kbps, sampling frequency at 44.1kHz to achieve CD-like music playback quality.

Since downloading MP3 files from the Internet, ripping songs from your own legal CD's and burning MP3 songs onto a CD-R, are a delicate process, the quality of a MP3 song may vary by these process. Subsequently, making a MP3-CD may not be entirely perfect.

As a result of the above imperfection, you may experience an occasional "skip" while listening, or an occasional delay in accessing "previous/next" title to MP3-CD's. This is considered to be normal.

A comparison chart is enclosed as below:

Sound Quality	Bit Rate	Approximate Reduction Ratio	Approximate total MP3-CD time	Comment
MW radio	32 kbps	40 : 1	40 hrs	Sound quality significantly affected-not recommended.
FM radio	64 kbps	20 : 1	20 hrs	
Near-CD	96 kbps	15 : 1	15 hrs	Balanced sound quality compression rate.
CD-like	128 kbps	10 : 1	10 hrs	
CD	256 kbps	5 : 1	5 hrs	Compression rate low suggest to play CDs instead.
CD	320 kbps	3 : 1	3 hrs

POWER SUPPLY

IMPORTANT!
For best CD/MP3-CD/VCD playback, please plug in your set to an AC power supply where convenient.
If operated in DC mode, see below approximate playtime. (Playtime is also varied from different brand batteries) :

Battery type	Playtime
Alkaline	approximate 9 hrs
Zinc Cartonate	approximate 45 minutes

The CD part of this system also serves as a Video CD player if you connect it to your TV set.
Before viewing the Video CD, ensure that the set is switched to corresponding PAL or NTSC system of your TV set (exception Multi-system TV).

BATTERIES (NOT SUPPLIED)

Whenever convenient, use the mains supply if you want to conserve battery life. The battery supply will be switched off when the set is connected to the mains. Make sure you remove the plug from the set and wall outlet before inserting batteries.

Batteries

1. Open the battery compartment and insert six batteries, type **R14**, **UM2** or **C-cells**, (**preferably alkaline**) with the correct polarity as indicated by the "+" and "-" symbols inside the compartment.

Remote control

Open the battery compartment and insert two batteries, type **AAA**, **R03** or **UM4** (preferably alkaline).
2. Replace the compartment door, making sure the batteries are firmly and correctly in place.

3. Remove the batteries if they are exhausted or if they will not be used for a long period.

– The incorrect use of batteries can cause electrolyte leakage and will corrode the compartment or cause the batteries to burst. Therefore:
– Do not mix battery types, e.g. alkaline with zinc carbonate.
– When inserting new batteries, replace all at the same time.
– Remove the batteries if the set is not to be used for a long time.

Note :
– *The battery supply is switched off when the set is connected to the mains.*

TV screen is disabled during CD / MP3-CD playing if your AZ5130 is battery powered.

*Batteries contain chemical substances, so they should be disposed of properly*

MAINS

1. Check if the mains voltage as shown on the type plate (on the bottom of the set) corresponds to your local mains voltage. If it does not consult your dealer or service organization.

2. Connect the mains lead to the **AC MAINS ~** socket and the wall socket.

→ The set is now ready for use.

3. To switch off the mains supply completely, pull the mains plug out of the wall socket.

→ Disconnect the mains lead when you change over to battery supply, or to protect the set during heavy thunderstorms.
***The type plate is located on the bottom of the set.***

GENERAL OPERATION

4. To switch off, set the source selector to the **TAPE/OFF** position (with the cassette keys released).
