Highlights

80 GB hard disk/1500 CDs

The 80 GB hard disk provides a very large capacity for you to store your digital audio files, easily holding up to 1500 audio CDs. Space saving, smart audio collection management, easy access and all in one place.

Class 'D' Amplifier

The Class 'D' Digital Amplifier takes an analogue signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output

delivers all the advantages of digital audio, including improved sound quality. In addition, the Class 'D' Digital Amplifier has over 90% efficiency compared to traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.
