- Wireless music streaming via Bluetooth
- Built-in Digital FM radio
- Easy playback from MicroSD Card

PHILIPS

Highlights

Advanced audio performance

Advanced audio performance with a compact design

Audio-in

Audio-in for easy connection to almost any electronic device

Built-in microphone

With its built-in microphone, this speaker also works as a speaker phone. When a call comes in, the music is put on pause and you can talk via the speaker. Call for a business meeting. Or, call your friend from a party. Either way, it works great.

Built-in rechargeable battery

Play music out loud - anytime, anywhere. The built-in rechargeable battery lets you enjoy your personal music without the fuss of entangled power cords and the inconvenient search for an electrical outlet. Enjoy great music with the freedom of portability now.

by-packed finely knitted strip

In line with the Philips CitiScape Strada's headband series, which was inspired by fashion sneakers and their vividly colored shoelaces, our by-packed strip is

made of a vibrant and finely knitted fabric sleeve making it stylish enough to be a fashion accessory.

Digital FM radio

Digital Radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be find. With digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

Music from multiple sources

Enjoy music from multiple sources

MicroSD card

Simply load the card with the desired content, plug it into your player – and never have to worry about running out of entertainment choices again.

Bluetooth music streaming

Listen to all your favorite songs on a speaker that delivers fabulous sound. This Philips docking speaker plays music from your Android powered devices via Bluetooth. Simply download the free Philips DockStudio app and the Bluetooth will automatically be turned on and connect once when your device is docked. You get to enjoy powerful and outstanding sound, with unbeatable convenience. Hardly anything else sounds as good.

Splash-proof design (IPX3)

A lightly water resistant design makes the speaker ideal for use in wet conditions, so you can enjoy your music anywhere you want.
