# Highlights

## 18 cm/7" TFT color LCD (16:9)

The color LCD display brings images to life, showing off your treasured photos, favorite movies and music with the same 'real life' rich detail and vibrant colors as high quality prints. The 16:9 widescreen aspect ratio is standard for universal to high-definition digital television. A native 16:9 aspect ratio means video display without bars at top and bottom of the picture and without the quality loss that comes from scaling, altering an image to fit on a different screen size.

## DVD, DVD+/-RW, (S)VCD, CD

The Philips Portable DVD player is compatible with most DVD and CD discs available in the market. DVD, DVD+/-R, DVD+/-RW, (S)VCD, and CD – all of them can play on the

DVD player. DVD+/-R is a shorthand term for a DVD drive that can accept both of the common recordable DVD formats. Likewise, DVD+/-RW handles both common rewritable disc types.

## MP3-CD, CD and CD-RW playback

MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. A single CD can store up to 10 hours of music.

## Smart Car Mount

To enjoy entertainment on the go, why not bring your portable DVD player from home on the road with you? A unique Car Mount system ensures ease-of-use, with a quick-

release arm that facilitates easy removal of the player when not in use. You can bring the portable DVD player with you, leaving just the Mount behind in the car.

## Single cable connection

The single cable connection design means there is just one cable needed to connect the two Philips Portable DVD players together. No additional cables are needed, there is no mess created and installation takes a few seconds.

## Watch movies separately

The in-car dual player design lets you watch movies individually on each portable DVD player. Alternatively, you can connect them together and, with the single touch of the signal switch button, passengers in both the front and back seats can watch one movie playing simultaneously on both DVD players.

## DivX Certified

With DivX<sup>®</sup> support, you are able to enjoy DivX encoded videos and movies from the Internet, including purchased Hollywood films. The DivX media format is an MPEG-4 based video compression technology that enables you to save large files like movies, trailers and music videos on media like CD-R/RW and DVD recordable discs, USB storage and other memory cards for playback on your DivX Certified<sup>®</sup> Philips device.
