HDMI ARC
150W

HTL3150B

Unmatched voice clarity from 3.1 Ch

with wireless subwoofer

Upgrade your TV with enhanced voice clarity and virtual surround sound for a better cinematic experience, plus wireless music streaming over Bluetooth.

Connect and enjoy all your entertainment

- Wireless music streaming via Bluetooth
- EasyLink to control all HDMI CEC devices via a single remote
- Enjoy MP3 music directly from your portable USB devices
- Audio in to enjoy music from iPod/iPhone/MP3 player
- Works with TVs, BD/DVD players, gaming consoles, MP3 players

Designed for simplicity

- Low-rise profile for the perfect fit in front of your TV
- Touch panel for intuitive playback and volume control

Richer sound for watching TV and movies

- Dedicated center-channel speaker for superior voice clarity
- Dolby Digital and Pro Logic II surround sound
- Virtual Surround Sound for a realistic movie experience
- Wireless subwoofer adds thrill to the action

PHILIPS

Highlights

Center-channel speaker

A centre-channel speaker dedicated especially to voice frequencies anchor speech to the centre of the screen. This offers improved voice positioning and clarity, increasing immersion in movies.

Dolby Digital and Pro Logic II

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than

five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Bluetooth

Bluetooth is a short range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favorite music from any smartphone, tablet or laptop, including the iPod or iPhone with a Bluetooth-enabled speaker.

EasyLink

EasyLink lets you control multiple devices like DVD players, Blu-ray players, soundbar speaker, Home theater and TV's etc. with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

USB playback

Simply plug in your device to the USB port on your Philips Soundbar speaker. Your digital music will be played directly from the device. Now you can share your favorite moments with family and friends.

Specifications

Sound

- Sound Enhancement: Night Mode, Treble and Bass Control, Virtual Surround Sound, Audio sync, Movie, Music, Voice
