- Turn your Smartphone into a remote for Philips AV products

Quality sound performance

- FullSound enriches your music with fuller bass and clarity
- LivingSound for wider, immersive stereo sound
- 30 W RMS total output power

PHILIPS

Highlights

Wireless stream music and photos

Your PC/ MAC is filled with music that you can now conveniently stream onto your Philips audio device – without messy cables. Share your favourite songs with others at a party, or simply enjoy them in the comfort of your home. Do the same for your photo collections, and view them at leisure while you listen to music. Unlock your PC/ MAC treasures with the convenience of wireless streaming.

Full colour touch screen

Touch-screen control allows you to control your device by simply pressing on-screen buttons rather than physical buttons on the device. Simply power up the device and the touch-screen user interface will show up on the LCD display with all the control options for the device. Touch-screen control combines LCD display technology with pressure sensors and a powerful digital micro processor. When you press on a specific area of the screen with your finger, the relevant signal is sent to the processor and the command is immediately executed.

MyRemote app

The Philips MyRemote app lets you use your iPhone, iPod Touch or Android Smartphone as a remote to control your Philips networked AV products. The app automatically recognises your Philips Blu-ray player, Home theatre or Streamium audio system connected to your home Wi-Fi network, and gives you instant control over the devices from anywhere in your home. And if you have more than one Philips networked AV product, the app will allow you to switch between them and control each one independently. This free app is created exclusively by Philips.

Napster online music library*

Get all the music you ever want with Napster – an online music service that offers you over 10 million tracks from 790,000 artists, 980,000 albums and all genres. Access to Napster is made effortless with the Philips micro system, thanks to the icon-based LCD display panel, and gives you all the music you want – quickly and easily. With just a few clicks, Napster's vast library is freed from your PC or MAC, and streamed wirelessly for you to enjoy on the

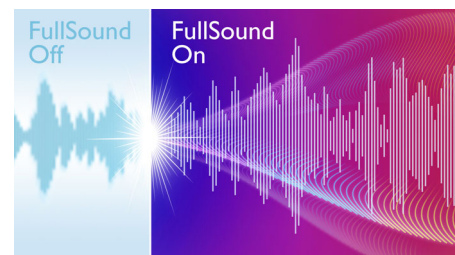

Philips system. Change the way you listen to music now.

Internet radio stations

Streamium comes with thousands of Internet radio stations. Now you can stay abreast of all kinds of music worldwide. Connect your Streamium to the Internet and listen to your favourite online programmes without having to turn on your PC/MAC.

FullSound

Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you can experience music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice, improved instrument clarity and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.
