Talk Hands-free

Great sound reproduction, without having to hold the phone to your ear – so you can talk completely hands-free. A true plug-and-play device with a user-friendly menu and an inbuilt answering machine. A great chat has never been easier.

Eco-conscious product

- Low radiation and power consumption

Nice and simple

- Easy to read 1.6" (4.1 cm) graphical display with backlight
- Freestanding handset with a speaker for easy hands-free calls
- Menu in multiple local languages
- Programmable hot keys for quick dial
- Textured back cover for non-slip grip
- Up to 16 hours of talk time on a single charge
- Up to 25 minutes of messages on your answering machine
- Caller ID – so you always know who is calling*

Crystal clear sound

- The Parametric Equaliser delivers pure and clear sound
- Optimised antenna layout for great reception in any room
- Advanced sound testing and tuning for superb voice quality

Highlights

4.1-cm (1.6") graphical display

Easy to read 1.6" (4.1 cm) graphical display with backlight

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and hands-free modes.

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Handset speakerphone

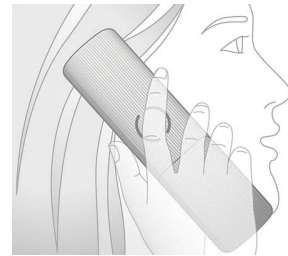

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Menu in local languages

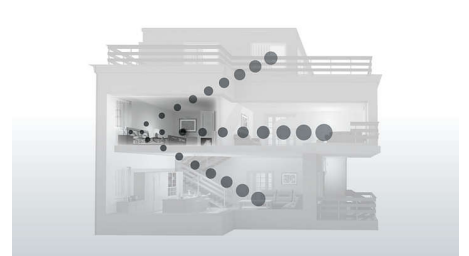

Enjoy easy setup, navigation and control with intuitive menu available in local languages.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Optimised antenna layout

Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equaliser

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Highlights

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialling, you will never have to search for their number again. You can programme up to 2 keys for instant calling.

Up to 16 hours talk time

Up to 16 hours of talk time on a single charge

Up to 25 min. recording

Up to 25 minutes of messages on your answering machine
