Guarantee

The line adaptor may not be attached to the line cord. You may find the line adaptor in the box. In this case, you have to connect the line adaptor to the line cord first before plugging the line cord to the line socket.

In multihandset packs, you will find one or more additional handsets, chargers with power supply units and additional rechargeable batteries.

⚠ WARNING Always use the cables and batteries that are supplied with your phone.

1 Connect

Connect the base station

1. Insert the plug of the power cord into the socket under the base station
2. Insert the plug of the line cord into the socket under the base station
3. Connect the other end of the line cord together with the line adaptor if necessary, to the telephone line socket and the other end of the power cable to the electricity socket

2 Install

Insert rechargeable batteries and charge

Insert batteries

Charge handset for 24 hours

 Configure your phone

1. Press  and the available country code blinks.

Troubleshooting

For more information, see the user manual that came with your CD140 or CD145.

Problem

- No dialing tone
- Poor audio quality
- The  icon is blinking
- The handset LCD displays nothing
- Caller Line Identification (CLI) service does not work

Solution

- Check the connections
- Charge the batteries for at least 24 hours
- Use the line cable provided
- Move closer to the base station
- Move the base station at least one metre away from any electrical appliances
- Register the handset to the base station
- Move closer to the base station
- Try again by disconnecting and connecting the base station power supply and follow the procedure to register a handset
- Make sure the two supplied rechargeable batteries have been inserted into the battery compartment
- Make sure the supplied batteries are charged up
- Check your subscription with your network operator
