Highlights

Direct access answ. machine

The control keys located on the base allows you to access in an easy and straight forward way all functions of your digital answering machine. You'll never miss a call or message.

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Direct access to preferred nr.

A short press on one of the dedicated handset key lets you directly access the preferred number you have assigned to that key.
