- Enjoy MP3/WMA music directly from your portable USB drives

Enrich your sound experience

- 2x5W RMS/2x10W music power/400W PMPO
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound

PHILIPS

Highlights

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Rip your favorite CDs to MP3

Simply plug in your USB mass storage device to the USB port on Philips audio system and start recording your favorite music from CDs to your USB device or MP3 player - with one touch and no computer needed. So you can create your own MP3 files via direct MP3 digital recording.

Specifications
