# Highlights

## Dual TFT LCD screens

Dual screens allow you to display the same videos or images from the portable DVD player. Simply plug in and mount the screens on the headrests in your car. Now you can enjoy your favourite DVD movies and JPEG photos with family and friends in the back seats easily and comfortably.

## DVD, DVD+/-RW, (S)VCD, CD

The Philips Portable DVD player is compatible with most DVD and CD discs available in the market. DVD, DVD+/-R, DVD+/-RW, (S)VCD and CD – all of them can play on the DVD player. DVD+/-R is a shorthand term for a DVD drive that can accept both of the common recordable DVD formats. Likewise, DVD+/-RW handles both common rewritable disc types.

## 22.9 cm/9" TFT colour widescreen

The high resolution colour LCD display brings images to life, showing off your treasured photos, favourite movies and music with the same 'real life' rich detail and vibrant colours as high quality prints.

## Watch movies separately

The in-car dual player design lets you watch movies individually on each portable DVD player. Alternatively, you can connect them together and, with the single touch of the signal switch button, passengers in both the front and back seats can watch one movie playing simultaneously on both DVD players.
