Introduction

Philips digital PhotoFrameTM can be placed either vertically or horizontally to fit the photos on display. Its internal rechargeable battery provides you with the freedom to pass it around and show photos without the power cord. Or, you can place it somewhere in a room for a continuous display by connecting it to the mains power supply.

I. Getting started

I.I Packing list

Digital PhotoFrame™

Quick start guide

Power adaptor

User manual and Auto Run software on CD

USB Cable to PC (male B type plug)

What else you'll need

Power outlet

Digital Photos on memory card or PC

I.2 Initial setup

Remove the parts from the packaging

I.2.1 Connecting Power Source

Connect the supplied power cable from PhotoFrame[™] to a power outlet.

The internal battery will start charging and the battery LED turns blue and flashes. This will take approximately 3 hours.

Note: For safety reason and best stability Philips recommend to adjust the stand with the angle defined by the two clicked position. Using other positions may cause the PhotoFrameTM to fall and is under the entire responsibility of the user.

I.2.2 Locate Control Buttons

- Use your PhotoFrame[™] by pressing the control buttons in the back.
- The control buttons and instructions are shown at the bottom of the menu screen.

I.2.3 Turning on PhotoFrame™

Press the power ON/OFF button. The power LED will be blue and a slide show will play

| Photo Frame | | |

I.2.5 Setting Time, Date and Clock

Use this function to set the time and date of the PhotoFrameTM.

Press the **menu** button to access the Main Menu. Navigate **down** to highlight the setup icon. Navigate **right** or press the **OK** button to access the setup menu.

Navigate **down** to Clock. Navigate **right** to access the Time settings.

Time:

Navigate **up** and **down** to select the time.

Navigate left and right to move between hours, minutes and AM/PM.

Press the **OK** button to confirm selection.

Date:

Navigate **up** and **down** to select the date.

Navigate left and right to move between days, months and years.

Press the **OK** button to confirm selection.

Show Clock:

If you want to use the PhotoFrame[™] as a clock

Navigate **up** and **down** to select Show clock

Navigate right then ${\bf up}$ and ${\bf down}$ to select No Clock ,Full Screen , In Slideshow or Both

Press the **OK** button to confirm selection.

Press **Play Slideshow** to leave this menu and play the slideshow

NOTE: The time and date must be set before the Event Reminder and Auto on/off functions can be set. **Note 2:** Show clock

You can have a clock displayed on the screen on the top of your pictures in Slideshow and browse mode.

1.2.6 Play Photos from Memory Card

A. CF Card B. SD/ MMC /MS / xD Card

Inserting a memory card:

- Insert the memory card into the slot in the frame.
- For a Compact Flash card, firmly slide card in the larger slot end first and face DOWN.
- For a xD, SD, MMC, or Memory Stick card slide card in the smaller slot end first and face UP until it locks in-place.

After a few seconds photos on the memory card will display and a slideshow will start.

Please DO NOT remove the memory card just after inserting it in PhotoFrame[™] or when PhotoFrame[™] is counting the Photo. Wait until the screen is stable

Removing a memory card:

- To remove the Compact Flash card, pull out the card slowly.
- To remove the xD, xD, SD, MMC, or Memory Stick card, push the card again to unlock and then pull out the card.

IMPORTANT NOTICE: Philips PhotoFrame[™] do not support memory stick Duo, PRO Duo and RS-MMC even with adaptor

Note: To copy photo from the memory card to the PhotoFrame[™] read the copying photo section.

- Tips: Increase the memory of the PhotoFrame[™] by permanently inserting permanently a memory card into it. This allows the same functions as the internal memory to be performed.
 - Two memory card slots can be used at the same time; therefore one can be dedicated for the extended memory, and the other slot for reading and copying pictures from the camera memory card.

Note: To be able to delete photos on the memory card this function on the memory card must be allowed. To do so read the "Setup- Memory card" section.

I.2.7 Copy photos from PC

| For Windows PC (2000 & XP): To copy photos from PC to PhotoFrame[™], install Auto Run software PhotoFrame[™] manager on PC For installation and more details about his application, follow instrustions in user manual on CD For Mac System: (OS X or later): Connect PhotoFrame[™] to the Mac via USB cable . 2. Enjoying Photos

2.1 Browse Mode

- To enter Browse mode you need to be in Slideshow mode and click once on the Play/Stop button.
- To move through the photos, navigate **left** and **right**.
- To restart the slideshow Press the **Play slideshow stop** button.

2.2 Slide Show Mode

Slideshow mode is entered once you turn on the PhotoFrameTM. **Navigate left** and **right** to move quickly through the photos.

Note 1: The frequency of the slideshow can be adjusted. To do so please read "slideshow frequency" section.

Note 2: For slideshow creation and management read the section "Creating and managing slideshow"

Note 3: Photos are easily editable from slideshow mode by pressing the **OK** button. To go directly to thumbnail mode form read the photo menu section.

3. Managing Photos and Albums

3.1 Thumbnail Access and Navigation

A large number of Photos can be viewed quickly using thumbnails.

Press the **menu** button to access the Main Menu.

Navigate **right** or press the **OK** button to access the **Photo** menu.

Photos | Source Photo Frame New Album PHILIPS

Navigate **down** to select the photo source to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Navigate left and right to move between photos.

Note: If you press left on the first photo you will return to the previous menu.

Navigate **up** and **down** to move to the next 16 images.

Press **Play Slideshow** to leave this menu and play the slideshow

Or navigate **left** to move back through the menus.

3.2 Quick access to thumbnai

Thumbnails can be accessed directly from the slideshow by pressing the **OK** button. The thumbnail with the mini preview is launched and the picture last seen on the slideshow when you pressed the **OK** button is displayed.

3.3 Photo selection – single and multiple

Using the method below you can select either single, multiple or all 16 photos.

Press the **menu** button to access the Main Menu. Navigate **right** or press the **OK** button to access the **Photo** menu.

Navigate **down** to select the media to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Navigate left, right, up and down to move between photos.

Note: If you navigate **left** on slide I you will return to the previous menu.

Press **OK** to select individual images. (Select more than one picture by moving to a second picture and pressing **OK** again. To unselect a picture press **OK** again on the selected picture.

Press **OK** for **3** seconds to select all visible thumbnails.

Press the menu button to access the photo menu

Press **Play Slideshow** to leave this menu and play the slideshow Or navigate **left** to move back through the menus

3.4 Photo Menu

This menu allows the control all aspects of managing your photos. Copy, Delete and Move photos as well as select various effects, frames to apply to your photos.

3.4.1 Copying Photos

You can copy photos stored on a memory card or PC to PhotoFrameTM internal memory or in a Memory card plugged in the PhotoFrameTM. PhotoFrameTM will then internally store a resized copy of the original photo. This resized copy will remain inside PhotoFrameTM until you delete it from PhotoFrameTM.

Note: All photos processed and copied by the PhotoFrame $^{\text{TM}}$ will be resized for optimal display on PhotoFrame $^{\text{TM}}$ and to save storage space

PhotoFrame[™]'s internal memory will store 110-150 resized photos. See the Deleting Photos section to learn how to delete photos stored in PhotoFrame[™].

You may copy photos one by one or several photos at once.

Copying photos single and multiple photos

Insert the memory card into PhotoFrame[™] and follow instructions below.

Press the **menu** button to access the Main Menu.

Select the Photo icon and navigate **right** or press the **OK** button to access the **Photo** menu.

Navigate **down** to select the media to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Navigate left and right to move between photos.

Note: If you navigate **left** on slide I you will return to the previous menu.

Navigate **up** and **down** to move to the next 16 images.

Press **OK** to select individual images.

Press **OK** for **3** seconds to select all visible thumbnails.

Once all required photos have been selected press the **menu** button.

Navigate **right** to go to the **source** you want to copy your photo to.

PHILIPS

Photos | Source | Photo Frame | Default album | Photo Mo

Copy to

Copy to

CF Card Memory sticl Navigate **down** to select the media to copy to. Navigate **right** to select which album to copy to. Press the **OK** button to begin copying.

Ő

The copy screen disappears upon completion and a resized copy of the photo is stored inside the selected album.

You may move to other photos and continue this process until all the photos you want are copied to the selected album.

Press **Play Slideshow** to leave this menu and play the slideshow Or navigate **left** to move back through the menus

WARNING: Do not remove the memory card before the copy screen disappears upon completion.

Note: When reading from a media card e.g. SD card, two folders (PC Folder and Camera Folder) may be displayed in the PhotoFrame \mathbb{M} .

PC Folder: is the combination of all the pictures copied from a PC to the memory card. (Only JPEG format are recognized)

Camera Folder: is the combination of all the pictures created from a camera.

If a warning message shows up indicating no free space for more photos, you may need to remove some already stored photos first before copying more photos.

NOTE: Only JPEG format photos are supported. Sub-directories are not supported.

The number of photos accepted in this directory may be limited due to limited internal memory on PhotoFrameTM. Therefore, it is highly recommended to put the photos on a memory card and copy the photos to PhotoFrameTM from that memory card.

Disconnect the USB cable.

For Windows 2000 systems, remember to safely remove hardware before disconnection

After a few seconds, all photos in the root directory will be automatically added to PhotoFrameTM and the root directory will be emptied.

To copy from PhotoFrame[™] to PC

Copy the photos on PhotoFrameTM to PC the same way you transfer the contents of a digital camera to PC. All photos are stored in the sub-directories of the \DCIM\on the PhotoFrameTM drive.

3.4.2 Deleting Photos2

If you need to free up space on the PhotoFrame[™] or a memory card you can delete photos.

Press the **menu** button to access the Main Menu. Navigate **right** or press the **OK** button to access the slideshow menu.

Navigate **down** to select the source to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Press the **navigation** buttons to move between photos. Press the **OK** button to select individual images. Press the **OK** button for **3** seconds to select all visible thumbnails. Once all required photos have been selected press the **menu** button.

Navigate **down** to select **Yes** delete. Press **OK** to confirm delete.

When you delete a photo, PhotoFrame ${}^{\rm TM}$ will show the status and return to the album after completion.

Press **Play Slideshow** to leave this menu and play the slideshow Or navigate **left** to move back through the menus

Note: You may delete photos one by one or several photos at once.

Note: To delete a Photo from a memory card Go to **Setup Menu > Memory Card > Album Creation > Delete Function**. You will be able to perform the same functions as the internal memory.

Note: To be able to delete photos on the memory card this function on the memory card must be allowed. To do so read the "Setup- Memory card" section.

3.4.3 Rotating, Zooming and Cropping3

PhotoFrameTM can change the orientation of photos and change the framing of photos. **Note:** The crop function only applies to original photos stored on external memory card.

Rotating

Press the **menu** button to access the Main Menu.

Navigate **right** or press the **OK** button to access the slideshow menu.

Navigate **down** to select the media to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Use the **navigation** buttons to select the photo. Press the **menu** button to enter the photo menu. Navigate **down** to go to **Rotate and Crop**. Navigate **right** to go to the orientation.

Navigate **down** to select the rotation.

Press **OK** to confirm rotation.

You will then access the crop function window.

Note: If you don't want to crop your photos press the **play slideshow** button.

Press **Play Slideshow** to return to Main button Or navigate **left** to move back through the menus

Zooming and Cropping

Note: To retain image quality it is recommended that zooming and cropping is carried out before the image is stored in an album. This function only applies to original photos not those processed by the PhotoFrame \mathbb{M} .

Note: All photos processed and copied by the PhotoFrame $^{\text{TM}}$ will be resized for optimal display on PhotoFrame $^{\text{TM}}$ and to save storage space.

Press the **menu** button to access the **Main** Menu.

Navigate **right** or press the **OK** button to access the **Photo** menu.

Navigate **down** to select the media to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Use the **zoom +** button decrease the crop frame. Use the Navigation button to move the frame around the image.

Press **OK** to confirm crop.

Press Play Slideshow to leave this menu and play the slideshow

3.4.4 Moving Photos4

Photos can only be moved between albums created by PhotoFrameTM on internal memory or external memory card.

Press the **menu** button to access the Main Menu.

Navigate **right** or press the **OK** button to access the **Photo** menu.

Navigate **down** to select the media to browse. Navigate **right** to enter the required album.

Navigate **right** to view the photos in the chosen album.

Navigate **down** to go to status.

The status of the PhotoFrameTM is shown in the right window.

If you have a memory card in the PhotoFrame ${}^{\rm T\!M}$ it will give you the status of the card (card Type and free memory left).

Press **Play Slideshow** to leave this menu and play the slideshow or

Press **OK** to exit

6 Getting help

6.1 Checking Display Status

You may check the status of your PhotoFrameTM— whether the system is ON, if the battery is charging, how many more photos can be stored, how much battery power remains, which media are currently connected, or the PhotoFrameTM software version.

From the LED light indicator in the back, you can determine whether the system is ON or the battery is charging:

Power LED

Lighting Blue: System ON/ Battery charged Turned OFF: System OFF Flashing Blue: Battery is charging

Below is an easy way to look up other information.

Press menu button again to leave this menu.

6.2 Taking Care of PhotoFrame[™]

- Do not drop PhotoFrame[™] is a complicated electronic device and cannot withstand shock from being dropped.
- Do not expose to moisture PhotoFrame[™] is neither moisture proof nor moisture resistant. Exposing it to moisture or liquid of any kind will very likely damage your PhotoFrame[™].
- 3) Do not hit or scratch The LCD panel of PhotoFrame[™] is made of glass and is therefore sensitive to abnormal force and sharp edges.
- Screen cleaning Use only a dry soft cloth to clean your screen.

5) Battery charging For first time use, fully charge your PhotoFrame[™] (Battery LED will be off when battery is fully charged). This process may take up to 3 hours or more. PhotoFrame[™] starts fully recharging its internal battery only when the battery level is below certain value. This is designed to extend your PhotoFrame[™] battery life by reducing unnecessary battery charging.

- 6) Keep the stand clear from cables Make sure the stand of your PhotoFrame[™] is clear from cables as cables could pull the stand out of PhotoFrame[™] to the floor.
- 7) Temperature and humidity limitations
 Operating temperature: 0° ~ 45° (Celsius) / 32° ~ 113° (Fahrenheit)
 Humidity: 20% ~ 80%

6.3 Frequently asked questions

- Q: Is the LCD screen touch-enabled?
 A: The LCD screen is not touch-enabled. Use the buttons on the back to control Digital PhotoFrame[™].
- Q: Can I switch between different slideshows photos by using different memory cards?
 A: Yes. When a memory card is connected to the Digital PhotoFrame[™], it'll slideshow photos stored on that specific card.
- 3) Q: How can I quick-charge my PhotoFrame™?
 A: Charge it with the system in OFF status. PhotoFrame™ will be > 85% charged in 2 hours when system is OFF and in 5 hours when system is ON.
- 4) Q: Will the LCD screen be damaged if I keep showing the same photo for a long time?
 A: No. Digital PhotoFrame[™] can display the same photo continuously for 1,000 hours without any damage to the LCD screen.
- 5) Q: Can I use Digital PhotoFrame[™] to delete photos on memory card?
 A: Yes, it supports operations to delete photos on external devices such as a memory cards.
- 6) Q: Can I print photos from Digital PhotoFrame™?
 A: No, it does not support direct photo printing.
- 7) Q: After copying photos, how can I check if the photos are already stored inside?
 A: The photos are copied after the screen confirms with "photo copied" message.
- 8) **Q:** How does Digital PhotoFrame[™] show high-resolution 4:3 digital photos on its 3:2 screen?

A: To ensure high picture integrity, Digital PhotoFrame[™] shrinks the photos at original aspect ratio and trims excessive portions before displaying these photos.

- 9) Q: Can I use Digital PhotoFrame[™] during its Auto-off periods?
 A: Yes. Press any control button to bring the system back to ON status.
- Q: Can I increase the memory size to store more pictures on my DPD?
 A: No. The internal memory of DPD is fixed and cannot be expanded. However, you could switch between different photos by using different memory cards on DPD. Note: For example, if you insert a 250 MB memory card and use the PhotoFrame[™] to create album and copy photo you will be able to store more than 850 Photos.
- Q: Why doesn't my Digital PhotoFrame[™] show some of my photos?
 A: Digital cameras take photos and store them in JPEG format according to camera industry standards. Digital PhotoFrame[™] is designed to show photos following the same industry standards. Some images, such as web images, scanned images, or photos in RAW format from professional cameras, are not stored according to camera industry standards and therefore cannot be correctly displayed on Digital PhotoFrame[™]. Use PC applications to convert such images into standard JPEG format for Digital PhotoFrame[™].
- 12) My Digital PhotoFrame[™] is ON but the system does not respond anymore! First make sure the system is properly powered. Then use a pin to trigger the Reset button located **on the side of the power button** on the back to restore the system.
- Q: Why doesn't my Digital PhotoFrame[™] go into Auto-off status after I set it?
 A: First, make sure you set Current Time, Auto-off at, and Auto-on at correctly. Digital PhotoFrame[™] will automatically turn off its display exactly at the Auto-off time. If the time has already passed for the day, it will start entering Auto-off status at the specified time from the next day.

- Q: I'm trying to upload pictures from my PC directly to the PhotoFrame[™] using the USB connection, but I cannot get it working. What can I do?
 A: Connect PhotoFrame[™] to PC and put photos directly under the root directory of the PhotoFrame[™] drive. Disconnect the USB cable. After a few seconds, all photos in the root directory will be automatically added to PhotoFrame[™] and the directory will be emptied. Note that this operation does not apply to photos in sub-directories.
- 15) Q: I'm trying to upload pictures from my PC to a memory card, which I'm then inserting into the DPD. However, the DPD doesn't show the photos. What can I do?
 A: Load all the photos you want to upload to DPD in the root directory of your memory card. Power off your DPD, insert the memory card, and then restart DPD. After a few seconds, all photos in the root directory of the memory card will be automatically added to PhotoFrame[™]. The root directory on memory card will NOT be emptied after this operation. Note that this operation does not apply to photos in sub-directories.
- 16) Q: Do Philips PhotoFrame[™] support progressive JPEG ?
 A: PhotoFrame[™] do support progressive JPEG format picture, but the slideshow display might be very slow

7.1 Specification

Picture/Display

- Effective viewing area: 169.6 x 111.7 mm
- Resolution: 800 x 480 pixels (viewing area 680 x 480)
- Viewing angle: @ C/R > 10, 120° (H) / 110° (V)
- Lifetime, to 50% brightness: 20000 hr
- Brightness: 300 cd/m²

Connectivity

- USB: To PC

Storage Media

- Memory Card Types: Compact Flash type I, Memory Stick, Memory Stick Pro, Multimedia Card, Secure Digital, xD card
- Built-in memory capacity: 110 to 150 photos

Accessories

- Included Accessories: AC-DC Adapter, User manual & PC software CD, Quick start guide, and, USB cable, Wall mount kit

Dimensions

- Set dimensions with stand (W x H x D): $260 \times 199 \times 108 \text{ mm}$
- Weight: 0.97 kg
- Temperature range (operation): 0°C to 45°C
- Temperature range (storage): -20°C to 60°C

Power

- Power consumption: (System on and battery charging) 12 W
- Operating time on battery: I* hr
- Battery LED indicator: Charging Blinking
- Power LED indicator: Operation Blue
- Power mode supported: AC powered, Battery powered
- Other convenience: Kensington lock compatible

Convenience

- Card Reader: Build-in (2x)
- Photo format supported: JPEG photo (in DCF structure), Up to 12 Megapixels
- Placement supported: Landscape, Portrait, Photo auto orientation
- Buttons and controls: 2 buttons, 5-way mini joystick
- Playback mode: Full screen browse, Slideshow, Thumbnail browse
- Album management: Create, Delete, Edit, Rename
- Photo edit: Copy, Delete, Rotate, Crop, Move
- Photo effects: Black and White, Frames, Sepia
- Slideshow management: Create slideshow, Delete slideshow, Rename slideshow
- Slideshow setting: Collage, Random, Sequential, Transition effect
- Screen background color: Black, White, Gray
- Setup function: Brightness adjustment, Language, Status, Auto on/off on weekday/weekend,
- Beep on/off, Set time and date, Clock display enable/ disable, Event reminder with snooze,

Photo source

- System status: Battery level, Firmware version, Power source, Remaining memory
- Connected media status: Connected media, Remaining memory
