# Highlights

## 300 W RMS power

300 W RMS power delivers great sound for movies and music

## Dolby Digital

Because Dolby Digital standards, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

## Exposed speaker drivers

## Plays it all

Play virtually any disc and any media devices you want - whether they are DVDs, VCDs, CDs or USB devices. Experience the unbeatable convenience of great playability, and the luxury of sharing media files on your TV or home theatre system.

## HDMI for HD movies

HDMI is a direct digital connection that can carry digital HD video as well as digital multichannel audio. By eliminating the conversion to analogue signals it delivers perfect picture and sound quality, completely free from noise. Movies in standard definition can now be enjoyed in true high definition resolution—ensuring more details and more true-to-life pictures.

## Music iLink

Philips Music iLink allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player or laptop via a simple connection to your home theatre. Simply connect your audio device to the Music iLink jack to enjoy your music with the superior sound quality of the Philips home theatre.

## EasyLink

EasyLink lets you control multiple devices with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC-enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.
