Simply enjoy all your entertainment

- Easily connects to your TV with a single cable
- Connect additional AV devices via multiple audio connections
- Audio-in to enjoy music from iPod/iPhone/MP3 player

PHILIPS
Fidelio

Highlights

360Sound

Vastly different from conventional 2.1 home cinema speakers, 360Sound speakers are uniquely designed with three drivers in each satellite speaker—a front one and two side firing ones—which are angled to project immersive sound around you. In addition to the principle of dipoles, Philips uses a proprietary algorithm to further enhance the embracing sound effect. Built with premium acoustic components like soft dome tweeters, Neodymium magnets and Class D digital amplifiers, 360Sound delivers exceptional sound from all angles — giving you a true cinema experience in your own home.

Easily connects to your TV

Easily connects to your TV with a single cable

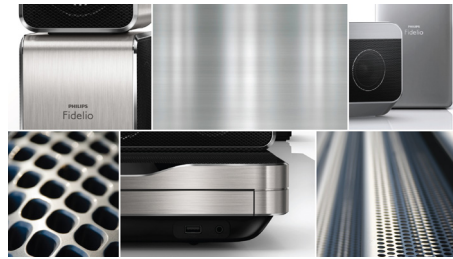

Connect additional AV devices

To enjoy cinematic surround sound for all your entertainment you can easily connect

additional Audio/Video devices to your SoundHub home cinema speakers. Connect, for example, a Blu-ray or DVD player or a games console by using one of the available digital or analogue connections: Optical in, Coaxial in or 2 AUX-in. You can also connect your MP3 player using the Music iLink connection on the side.

Sophisticated design

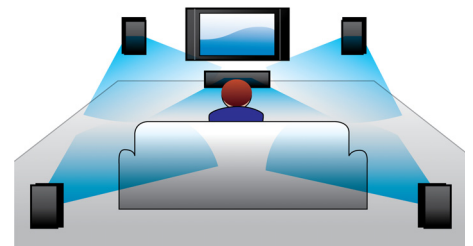

Aluminium is a statement of creative intent that is the modern medium of choice for many top interior designers worldwide. Lightweight yet strong, aluminium is an authentic material that helps create truly iconic designs whose ultra-thin and robust profiles perfectly showcase engineering excellence. The end result is Home theatres that are sure to catch eyes and turn heads in any room.

Audio in

Audio-in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player or laptop via a simple connection to your home cinema. Simply connect your audio device to the Audio-in jack to enjoy your music with the superior sound quality of the Philips home cinema system.

Dolby Digital and DTS

Go digital and get the most out of your music and movies. Even stereo music sounds great because Dolby Digital and DTS Digital Surround enhance digital music and videos, pumping it up so you get truly immersive surround sound out of your home cinema speaker.

Powerful active subwoofer

Powerful active subwoofer for a real cinema experience
