280W

HTL3170B

Unmatched voice clarity from 3.1 Ch

with wireless subwoofer

Upgrade your TV with enhanced voice clarity and virtual surround sound for a better cinematic experience, plus wireless music streaming with one-touch NFC pairing.

Connect and enjoy all your entertainment

- One-touch with NFC-enabled smartphones for Bluetooth pairing
- EasyLink to control all HDMI CEC devices via a single remote
- Wireless music streaming via Bluetooth
- Works with TVs, BD/DVD players, gaming consoles, MP3 players
- Audio in to enjoy music from iPod/iPhone/MP3 player
- Enjoy MP3 music directly from your portable USB devices

Designed for simplicity

- Low-rise profile for the perfect fit in front of your TV
- Touch panel for intuitive playback and volume control

Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- Dedicated center-channel speaker for superior voice clarity
- Dolby Digital and Pro Logic II surround sound
- Wireless subwoofer adds thrill to the action

PHILIPS

Highlights

Center-channel speaker

A centre-channel speaker dedicated especially to voice frequencies anchor speech to the centre of the screen. This offers improved voice positioning and clarity, increasing immersion in movies.

Dolby Digital and Pro Logic II

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-

channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Bluetooth

Bluetooth is a short range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favorite music from any smartphone, tablet or laptop, including the iPod or iPhone with a Bluetooth-enabled speaker.

One-touch with NFC

Pair Bluetooth® devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC enabled smartphone or tablet on the NFC area of a soundstage to turn the soundstage on, start Bluetooth® pairing, and begin streaming music.

EasyLink

EasyLink lets you control multiple devices like DVD players, Blu-ray players, soundbar

speaker, Home theater and TV's etc. with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

Wireless subwoofer

Wireless subwoofer adds thrill to the action

Touch panel for playback

Intuitive touch panel controls allows you to control the volume as well as other playback options by simply pressing the touch sensitive controls on the front panel.

Audio in

Audio in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player, or laptop via a simple connection to your Philips home cinema system. Simply connect your audio device to the Audio in jack to enjoy your music with the superior sound quality of the Philips home cinema system.

Specifications
