Other benefits

- Choose the right teat flow for your baby

Portable and convenient

- Ideal for occasional pumping any time, anywhere

Feed with Philips Avent bottles

- For a natural latch-on

Simple, comfortable expression

- For a quick milk flow
- More comfortable experience
- No need to lean forwards

Highlights

Natural Motion Technology

Enjoy the gentle comfort of the Philips Avent portable manual breast pump. With Natural Motion Technology, inspired by baby's own suckling action for a quick letdown. You can easily adjust the rhythm and vacuum.

Adaptive silicone cushion

The silicone cushion gently flexes and adapts to fit your unique nipple's size and shape. Fits 99.98% of all nipple sizes.

Finding the right teat is important

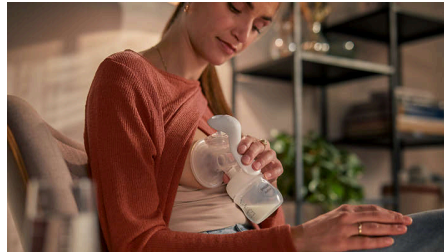

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Sit comfortably

Relax and sit comfortably while you express - thanks to our design that lets you sit upright, rather than having to lean forward.

Portable and easy to use

The breast pump is small and lightweight, which means it is easy to store and transport, making pumping on the go simple and discreet.

Easy to clean and set up

Because there are only a few parts, our new pump is easy to set up and clean.

Includes our Natural bottles

The wide, breast-shaped teat promotes natural latch-on similar to the breast, making it easy for your baby to combine breast and bottle feeding.
