### Comfortable, soft and silky teat

- 98% teat acceptance\*
- Teat made of 100% food-grade silicone
- Natural oral development
- Natural feel for baby

### Quality assured

- Designed and produced in the Netherlands

# Highlights

## Soft, flexible shield

Baby's skin needs extra care. Our shield technology lets this soother follow the natural curves of your baby's face. Your little one will experience fewer skin marks and less irritation on their cheeks.

## 98% teat acceptance\*

When we asked parents how their little ones respond to our textured, silicone teats, an average of 98% said that their baby accepts the Philips Avent ultra soft and ultra air soothers.

## Rounded shield

Our rounded shield minimises pressure on babies' cheeks for extra gentleness to the skin.

## Teat made of 100% silicone

We consciously chose silicone material for our ultra soft and ultra air teats since it's a safe and inert material, widely used in medical applications, and free from hazardous chemicals, endocrine active substances (e.g. BPA) and allergens.

## Orthodontic teat

Our orthodontic, symmetrical soft silicone nipples are designed for natural oral development.

## Natural feel for baby

Our textured silicone teat is designed to mimic the feel of mum's breast.

## Sterilise in 3 minutes

The travel case that comes with our ultra soft and ultra air soothers doubles as a steriliser. All you need to do is add some water and pop it in the microwave. Then rest easy that it's clean for the next use.

## Produced in the Netherlands

Our ultra soft and ultra air soothers are designed and produced in the Netherlands.
