User-friendly

- Upgrade your existing deadbolt by replacing the interior
- Simply share access anytime, anywhere

3000 series

Retrofit Lock

DDL230C15KTW/37

Highlights

Easy installation

The door lock installs in minutes with just a screwdriver and is compatible with most standard deadbolts.

Built-in Wi-Fi

The Philips Wi-Fi retrofit lock has a built-in Wi-Fi module, and does not require an extra Wi-Fi bridge to be controlled remotely. It is easy to control your lock and securely manage user account via the Philips Home Access App. You can also remotely unlock for your family members, friends, visitors and more.

Smart home ready

Control and check your lock status with voice command through Amazon Alexa or Google Assistant.

Upgrade your existing deadbolt

The retrofit lock is easy to install and set up. It is also compatible with most standard deadbolts in the market, and allows you to keep your original keys while enjoying the benefits of a smart lock.

Simple sharing

Easily share the access and set permissions with family members in the Philips Home Access app. Allow your family members to use and manage

the Philips smart lock from their smartphones. Or you can also share access with guests so that they can unlock the door from the app.

Built-in alerts

A built-in sensor will sense the vibration of the door and alert homeowners with notifications to the Philips Home Access App. Two alert modes let you know when someone is pounding at your door or knocking on your door.

Door position sensor

The door position sensor can let you confirm that your door is securely closed, no more asking for help from your neighbors to check your door status.
