# Highlights

## Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

## Caller ID\*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

## Easy setup

Ultimate convenience through easy set up.  
Simplified installation - Plug & Play product

## Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

## Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

## Menu in local languages

Enjoy easy set-up, navigation and control with intuitive menu available in local languages.

## Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

## Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

## Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

## Up to 10 hours talk time

Up to 10 hours talk time on a single charge

# Specifications

## Convenience
