- 20% longer plates for faster and better results
- 230°C professional high heat for perfect salon results
- Adjustable heat settings to ensure smooth results for every hair type
- 2.5 m cord

# Highlights

## Anodised Titanium plates

These straightening plates are made from Anodised Titanium. Anodised Titanium is 8 x more durable than traditional ceramic plates and is an incredibly hard yet ultra smooth surface. As a result, these advanced styling plates not only offer high shine, professional results but can also be used in conjunction with hair styling products such as gels, waxes and sprays.

## Longer plates

Longer hair needs longer plates. These plates are 20% longer and make straightening long, thick hair that little bit easier.

## 230°C professional temperature

This high temperature enables you change the shape of your hair, and gives you that perfect look, as if you've just come from the salon.

## Adjustable heat settings

Adjustable heat settings allow you to quickly and easily change the styling temperature from low to high. This enables you to select the perfect temperature for your specific hair and needs so you can always get the smooth, styling result you want.

## 2.5 m cord

The longer length results in improved flexibility and ease of handling, so you can use it anywhere you want.

## Glamorous pouch

Protect and store your straightener in style by using the glamorous storage pouch. The pouch is included in pack.

## Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

## Swivel cord

Useful swivel cord technology rotates the cord to prevent tangled wires.

## On/off indication light

On/off indication light
