Enjoy superior brightness for a safer drive

Superior brightness, a safer drive

For unmatched visual comfort and safer driving, choose Philips Ultinon Pro7000 LED signalling bulbs. In exterior applications, their vibrant colours and crisp, white light instantly improve driver visibility and well-being.

Superior visibility for safer driving

- Signal your intent with brighter exterior lighting
- Optimised for enhanced visibility
- Ergonomic design with 360° beam pattern

High-end, stylish signalling

- Upgrade your lights, upgrade your style

Performance made to last

- Enhanced lifetime of up to 5,000 hours
- Aluminium heatsink to dissipate heat more efficiently

Simple plug-and-play replacement

- Easy to install and compatible with most car models
- Electrical compatibility with most cars and trucks
- Easy to install on your car

Highlights

Powerful brightness

Signalling the intended movement of your vehicle is vital to your safety. To avoid collisions, other people have to know what you're doing. And when poor weather reduces visibility, the need for bright and vibrant signalling becomes even greater. Philips Ultinon Pro7000 LED signalling lights provide you with a bright, daylight effect plus up to 7000 K for reversing to improve visibility at the rear. Your car says a lot about you, so make a style statement with Philips LED signalling lights.

Uniform light distribution

For reversing lights, the Philips Ultinon Pro7000 LED gives you uniform light distribution. Its wide angle ensures that the light is projected where you need it.

Uniform light distribution

For your turn indicator, reversing, rear fog and brake lights, the Philips Ultinon Pro7000 LED gives you uniform light distribution. Its 360° angle ensures that the light is projected where you need it. Not only can you see more of the road, but other drivers can also see more of you.

Elegant LED light

While the main goal of exterior lighting is to help you see and be seen, there's no reason why you shouldn't look good at the same time. If you want to upgrade your style without buying a newer car, replacing your exterior lighting with Philips Ultinon Pro7000 LED lights is a smart way to spend your money.

Lifetime of up to 5,000 hours

You want bright, stylish car lights but you don't want to keep replacing failed lamps. That's a major weakness of conventional bulbs — the more powerful the light, the shorter its lifespan. Even at a higher light intensity, LEDs last much longer. Philips Ultinon Pro7000 LED lights are

built to last. Due to features such as high-end LED technology and advanced heat-management systems, they last for up to 5000 hours of operation and are covered by a 3-year warranty*.

Super-robust lamps made with aluminium

When operating, LEDs generate heat which reduces their brightness and overall lifespan. Philips Ultinon Pro7000 LED lights feature an aluminium heatsink, which dissipates heat much faster than the conventional plastic base used by low-cost, inferior-quality bulbs. That makes our lamps more robust and longer lasting.

Ready, steady, installed!

Enjoy the plug-and-play experience: Philips Ultinon Pro7000 LED lights use the same standard caps as the conventional lights on your car, enabling you to upgrade with no modification needed, so replacement is quick and easy.

Electrical compatibility with most cars and trucks

LED retrofit and conventional bulbs differ from one another in terms of wattage, composition and power consumption. Replacing your conventional bulbs with other LEDs may prove problematic. Thanks to the built-in constant IC driver, Philips Ultinon Pro7000 bulbs work within 9-32 volt systems and are electrically compatible with most cars and trucks. Canbus adapters are available as accessories for troubleshooting if needed. We sell a complete solution.

Polarity-free design

Enjoy the plug-and-play experience: the Philips Ultinon Pro7000 comes with polarity-free design, so you don't need to worry about polarity during installation. It will save you time and make installation easier.

Specifications

Marketing specifications

Product highlight: Polarity-free Automotive Grade LED Powerful brightness Uniform light distribution

Expected benefits: Brighter, elegant signals

Product description

Application: Rear fog and reversing lights for 12 and 24 V vehicles

Base: W2.1 x 9.5d

Designation: W16 W LED White 11067 CU70 12/24 V X1

Designation LED Type: LED-T16 [≈W16 W]

ECE certification: NO

Range: Ultinon Pro7000

Technology: LED

Type: W16W

Voltage: 12V + 24V V

Lifetime

Life time: 5000 hrs

Light characteristics

Lumens: 350 lm (12 V) 370 lm (24 V)

Colour temperature: 6000 K

Electrical characteristics

Voltage: 12/24 V

Wattage: 2.5 W (12 V) 2.7 W (24 V)
