Philips straightener with NourishCare technology allows you to beautifully style your hair and nourish it too! Deep conditioning serum protects your hair from heat damage so you get gorgeous, healthy-looking hair.

#### **Beautifully styled hair**

- Use fresh strips every session

#### **Nourish and Care**

- Simultaneously style and nourish your hair
- Protect your hair from heat damage
- Deep conditioning with the power of nourishing ingredients

# Highlights

## NourishCare Technology

NourishCare Technology combines vitamin E and Moroccan argan oil into one specially blended serum that nourishes your hair at the same time as you style it. So, no more pre-treatment, yet no heat damage either! Just healthy-looking, shinier hair\*\* you'll feel great about all day.

## Heat protection

The slow-releasing serum offers heat protection from the moment the straightening plates touch your hair. For better result, ensure strips are facing down towards hair ends and press the handles firmly together.

## Nutrient-rich serum

Our serum is a deeply conditioning blend of nutrient-rich ingredients suitable for different hair types. Vitamin E and Moroccan argan oil are well known for their conditioning and antioxidant properties. Together they help replenish your hair's shine to keep it looking and feeling smooth, soft and healthy.

## Replaceable serum strips

Serum strips are effective for one styling session. Replace them each time you style. It's easy to do and only takes a moment.
