

PHILIPS

AVENT

Anti-colic bottle
with AirFree vent

3 Bottles

9oz/260ml

Flow 2 nipple

1m+

SCY703/78

Designed to reduce colic, gas and reflux*

Our unique AirFree vent is designed to draw air away from the nipple keeping it full of milk, even when the bottle is horizontal. Reducing the amount of air your baby ingests help w/ common feeding issues such as colic, reflux, and gas.

Additional benefits

- A range of flow rates are available for your growing baby
- The Anti-colic bottles can be used with or without the vent
- This bottle is BPA free

AirFree vent designed for less air ingestion

- Nipple stays full of milk, even when bottle is horizontal
- Designed to keep nipple full of milk and avoid air ingestion

Clinically proven to reduce colic and fussing*

- Valve in the nipple prevents vacuum build-up*

Easy to assemble, use - and clean!

- AirFree vent is one piece, simple to use
- Secure latch – Nipple designed not to collapse
- Easy to clean - few parts for easy cleaning and assembly

Development stages

Stage: 0-12 months

- * At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic, and significantly less fussing at night compared to babies fed with another leading bottle.
- * 80% of moms agreed that "my baby experienced fewer feeding issues" in a home placement test with 144 mothers in the US in 2017
- * Our unique AirFree vent is designed to help your baby swallow less air as they drink by keeping the nipple full of milk during feeding. Reducing the amount of air your baby ingests helps w/common feeding issues such as colic, reflux & gas.
- * What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, gassiness and spit-up.
