Flows like a breast, aids to reduce feeding issues

A nipple that works like a breast*

Provides calm, comfortable feeds. The Natural Response Teat supports baby's unique drinking rhythm, while the AirFree vent is designed for extra protection against colic, gas and reflux. Finding the right nipple is important. See more below.

Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped nipple
- Nipple releases milk when baby actively drinks

Other benefits

- Choose the right nipple flow for your baby
- Explore our bottle range
- No-drip nipple design prevents spills and lost milk
- Easy to hold even for little hands
- Compatible across the Philips Avent range
- Simple to use, easy to clean and quick to assemble
- Natural Response Nipples and Bottles are BPA free*
- Be patient as baby adjusts

AirFree vent designed for less air ingestion

- Designed to reduce feeding issues

Finding the right nipple is important

Natural Response

Baby Bottle with Airfree vent

Highlights

No-drip nipple

The nipple opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Finding the right nipple is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a nipple with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Natural latch on

The wide, soft and flexible nipple is designed to mimic the shape and feel of a breast, helping baby to latch on and feed comfortably.

Natural Response Nipple

The Natural Response Nipple works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The nipple has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Find the right nipple flow

Every baby feeds differently, and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your

baby and personalize your bottle. All of the Natural Response Nipples are made of soft silicone.

Airfree vent

The AirFree vent is designed to offer extra protection against feeding issues by preventing air from getting into your little ones tummy while upright feeding.

Compatible across the range

Mix and match our breast pump, bottle and cup parts, and create the product that works for you, when you need it.

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly, as AirFree vent is a single piece.

Highlights

BPA free*

The Philips Avent Natural bottles and nipples are made of BPA free* material.

Be patient as baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.

Explore our bottle range

Our bottles are available in different sizes to better suit your baby's needs. Choose from a range of options to find the perfect fit for your little one, ensuring comfort and convenience at every stage.
