Power-free digital display boards

Technology for a brighter future

From confidently coloured menu boards to paper-free POS posters, Philips Tableaux bring new-era display potential to life. Digitise paper-based signage or swap out current digital models with ultra-clear, easily updatable ePaper displays.

Operational flexibility

- Run your content at all times

Brilliant performance

- Android SoC processor
- Full-colour e-paper display
- Sunlight readable

Cost-effective system solution

- Low power consumption, power-free operation

Versatile system solution

- Technology for the future

Highlights

Easy content loading

Displaying 60,000 colours, including blue, for clear and confident messaging and with 16 GB internal memory. Plug into a power source to upload new static content for instant play via USB, LAN or Wi-Fi connections.

Low to no power consumption

Perfect for environments without close access to power. Philips Tableaux can be positioned and repositioned, displaying colourful static content

in the same way as paper posters, and requiring a power connection only when loading new content.

Technology for the future

Developing technology for your sustainable future – power-free, waste-free, colourful paper poster replacements.

Powered by Android

Android-powered Philips professional displays are flexible and secure, ensuring that display specs stay up to the minute for longer.
