# Highlights

# WXGA 1366 x 768 resolution

The wide format of XGA resolution LCD panel is capable of displaying 1366  $\times$  768 pixels; WXGA allows monitors to be non-interlaced to ensure a better display performance and accurate color display effect.

#### Automatic brightness control

The adjustment of display settings to correspond with ambient light without user intervention.

#### Robust metal bezel

Specially designed for demanding public applications, the metal bezel offers higher durability and protection against vandalism. Annodized paint is used to offer extra protection of the bezel against scratches.

#### No unauthorized control

The local controls of the display are placed in such a way that they are less visible for immediate access. Furthermore the remote control sensor and the keypad on the display can

be disabled via RS232 in order to prevent unauthorized control of the display when placed in a public space.

# Remote Management:: RS232

Remote Management allows the user to control and adjust the displays remotely via the RS232 protocol. Using CEC commands, you are able to have full control over all the displays in your signage network at any time.

# **Zoom function for tiled matrix**

The internal zoom function enables easy implementation of a video wall matrix, without the need for expensive external equipment. Capable of many different configurations, creating a stunning video wall has become simplicity itself.

# Signal loop through

Multiple screen daisy chain effectively distributes control and visual content from a single source to an array of monitors in various locations within a site.

# Portrait mounting possible

This display is also able to be safely and reliably mounted in portrait position.

# **Optional TV tuner**

An optional TV tuner can be ordered separately and installed by the user by simply plugging in the unit in a slot at the back of the monitor. When switching on the monitor the tuner will be recognized.

# Intelligent power management

Intelligent power management employs energyefficient technologies in product design to reduce power consumption and significantly lower the total cost of ownership.

# No permanent burn-in

Public displays often show static information which could cause ghost images (burn-in). By simply switching off/on the monitor these ghost images disappear fully.
