Rich natural sound and handy companion app

- Philips Headphones app. Personalize settings and controls
- Warm, detailed, natural. Philips sound signature

6000 series

Over-ear wireless headphones

TAH6509BK/00

Highlights

Noise Canceling Pro

Adaptive noise cancellation quickly reacts to your surroundings to suppress external noise, including wind, in real time. If you want to hear whats going on around you, Awareness Mode lets outside sounds back in. Quick Awareness enhances voices, so you can have a conversation without removing your headphones.

Lightweight and comfy

The round ear-cup mounts and sleek frame give these over-ear headphones a distinctive sense of style. Memory foam ear-cup cushions keep you comfortable through long listening sessions and the ear cups fold flat and swivel inward for easy storage in your pocket or bag.

Great sound. Dynamic Bass

You'll enjoy rich sound from the 40 mm drivers, and good passive noise isolation from the over-ear fit. To enjoy the full power of your favorite

basslines without turning up the volume, simply activate Dynamic Bass via the multifunction button or the Philips Headphones app.

Up to 70 hrs (with ANC off)

You get well over a day of listening even if you have noise cancellation turned on. A full charge takes just 2 hours via USB-C, and a quick 5-minute charge gives you an extra 3 hours. You can also use a USB-C cable to plug into any smart device with a USB-C port.

Clear calls

Your voice will come through clearly when you're on a call. A dedicated mic picks up the sound of your voice while a noise-reduction algorithm quietsens some of the background noise from the world around you.

Philips Headphones app

Ever forget to turn off your headphones? Set a timer on our companion app and they'll power down automatically. The app also lets you manage connected devices or turn adaptive noise cancellation off and take control of the levels yourself. Plus, there's a range of preset sound styles: Voice is ideal for podcasts!

Convenient control buttons

Handy control buttons let you toggle between noise cancellation modes or activate Quick Awareness. The multi-function button lets you manage calls, control playback, and activate Dynamic Bass. If you're gaming or watching videos, you can trigger the low latency setting via the power button.

Solid Bluetooth connection

Advanced Bluetooth connectivity gives you a more stable connection for seamless streaming, and you can connect to two Bluetooth devices (iOS or Android) at the same time. Enjoy that playlist or listen uninterrupted to your favorite podcast without annoying dips in the sound.

Philips sound signature

Music to podcasts, these wireless headphones make the most of the sounds you love! You'll enjoy warm, detailed sound with rich bass from the large drivers, which are tuned to the Philips sound signature.
