

Looking to streamline your **cardiology scheduling** workflow and increase efficiency?

Take your cardiology scheduling workflow to the next level
across your enterprise.

Efficient resource utilization and driving hospital compliance across the enterprise can be a complex job.

Workflow Information Management scheduler offers more than just scheduling. It simplifies the collaboration across the enterprise and enhances patient and staff engagement for greater efficiency and, the latest release brings cardio scheduling capabilities on the market.

This highly configurable solution allows you to meet your specific multi-facility cardiology department needs. Whether you use it as a stand-alone or integrated system with your HIS/EMR, Workflow Information Management Scheduler can seamlessly communicate with your downstream systems to provide an end-to-end scheduling solution:

Are you a physician focused on patient care?

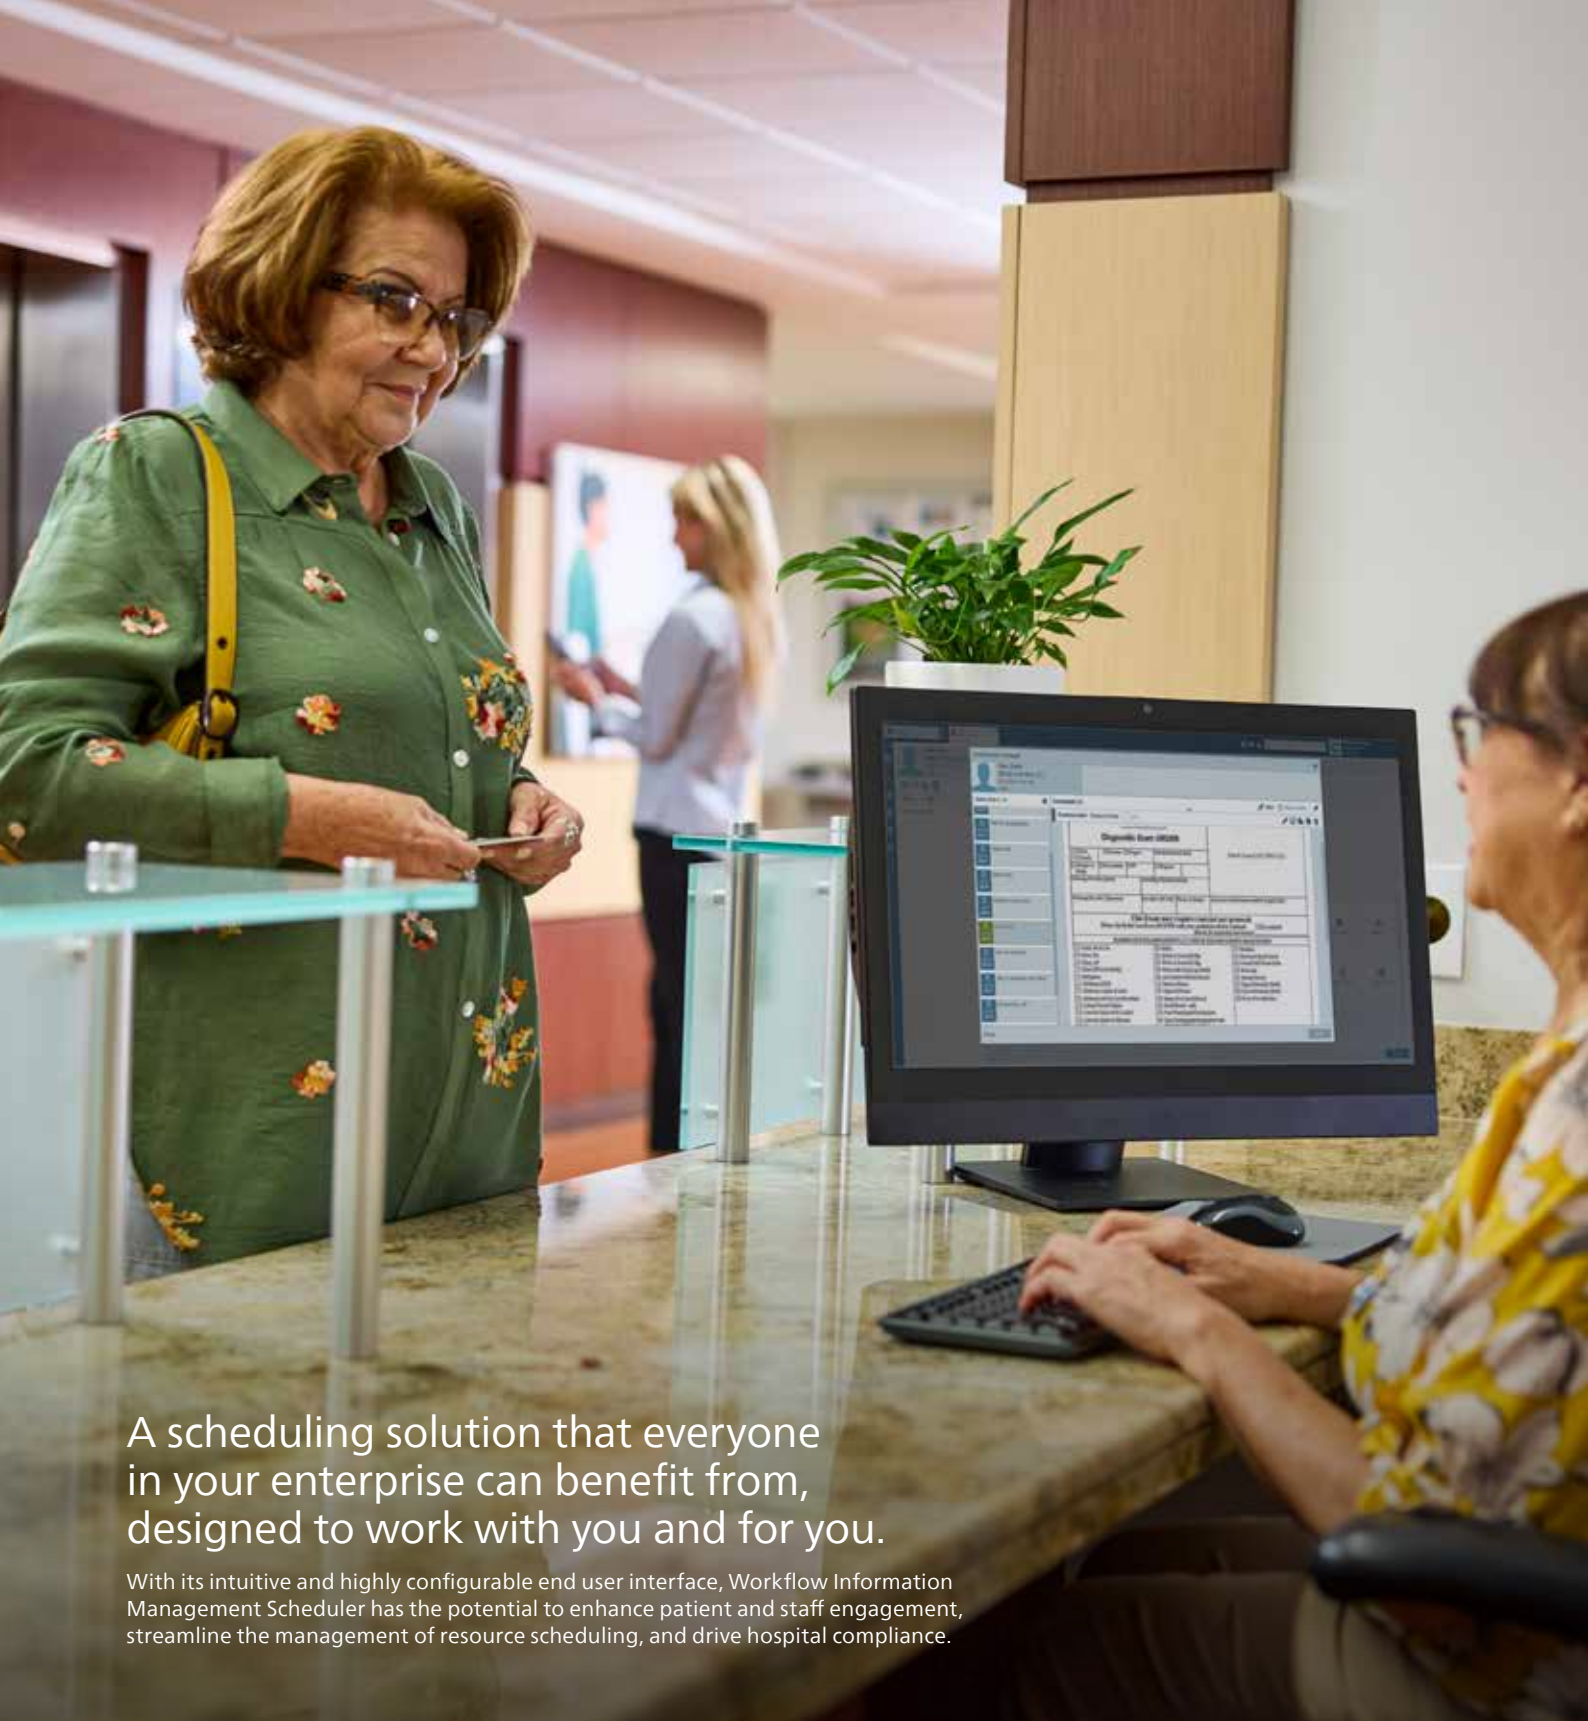

With a real-time view of your schedule, and a seamless integration with your information systems, you can have **all the insights you need for your patients with just one log-in**. With highly configurable worklists and easy to access patient information/history, users can find all needed information to proceed with few clicks through the scheduling workflow.

Are you a scheduling assistant looking to improve your operational efficiency and productivity?

Simplifies scheduling by providing tools to **book exams in an intuitive way in a few clicks**, also when used in complex organizations with multiple modalities, resources, and availability templates. Multi-modality and multi-day modes in the calendar availability allow users to have an immediate and easy overview of appointments availabilities. The scheduler offers the capability to reserve timeslots as soon as they are selected in any Workflow Information Management client (including the Patient Assistant portal), so that the reserved time slot will not be returned free when exam search is performed by other users.

Are you an administrator looking for reducing e administrative workload?

Optimize operations and reduce administrative burden and be on top of your administration with the ability to **configure your system** - meet your specific cardiology department, enabling employees to start working promptly. It helps ensure hospital compliance by enabling stakeholders to have the appropriate permissions and reduce the risk of errors.

A scheduling solution that everyone
in your enterprise can benefit from,
designed to work with you and for you.

With its intuitive and highly configurable end user interface, Workflow Information Management Scheduler has the potential to enhance patient and staff engagement, streamline the management of resource scheduling, and drive hospital compliance.
