- Excellent sound quality with soft dome tweeters & DoubleBASS
- Fullsound™ to bring your MP3 music to life

See

- HDMI 1080p upscales to high definition for sharper pictures

PHILIPS

Highlights

Ambisound

Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

SoundBar

The SoundBar is a complete all-in-one home theater solution that delivers superb 5.1 surround sound for an immersive movie experience. Integrating speakers, amplifiers and DVD player, the SoundBar is all you need below your television. It lets you keep your living room the way you want it, yet delivers an amazing multichannel sound experience - for movie moments shared with friends and family.

Matches any flat TV

The SoundBar lends an air of sophistication and grace to any living room. Though it is designed to fit a flat TV with a 94 cm (37") screen or larger, it will also sit under any other flat TV like a companion - matching all your interior and your lifestyle.

Excellent sound quality

Audio quality that is out-of-this-world is brought to you by DoubleBASS and soft dome tweeters. DoubleBASS captures low frequencies and recreates them in the audible range of the subwoofer, so you hear even the deepest bass tones. Soft dome tweeters reproduce clear high and mid-range frequencies that increases the audio clarity and widens the soundstage - so you hear everything, in all its purity.

HDMI 1080p

HDMI 1080p upscaling delivers images that are crystal clear. Movies in standard definition can now be enjoyed in true high definition resolution - ensuring more details and more true-to-life pictures. Progressive Scan (represented by "p" in "1080p") eliminates the

line structure prevalent on TV screens, again ensuring relentlessly sharp images. To top it off, HDMI makes a direct digital connection that can carry uncompressed digital HD video as well as digital multichannel audio, without conversions to analog - delivering perfect picture and sound quality, completely free from noise.

Hi-Speed USB 2.0 Link

The Universal Serial Bus or USB is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. Hi-Speed USB devices have a data transfer rate of up to 480 Mbps - up from the 12 Mbps in original USB ones. With Hi-Speed USB 2.0 Link, all you have to do is plug in your USB device, select the movie, music or photo and play away.

MP3 Link

MP3 Link allows playback of MP3 files, directly from your portable media player, on your home theater system. Simply connect your portable MP3 player to the built-in MP3 Link jack and enjoy your MP3 music in the superior sound quality delivered by the Philips home theatre system. MP3 Link brings your portable music into the comfort of your living room.

Specifications
