Superior surround sound without the clutter

Bring the cinema home

Indulge in cinema-like multi channel surround sound without speakers and wires all around you. Philips SoundBar with Ambisound incorporates a complete home theater system, including DVD and CD Playback in a single unit.

Designed to enhance your living space

- Flexible placement on the wall, tabletop or stand
- Touch panel for intuitive playback and volume control

Connect and enjoy all your entertainment

- EasyLink to control all HDMI CEC devices via a single remote
- Simple to set up with only three cables to connect
- Dock your iPod for media playback with on-screen control
- Enjoy all your movies and music from CD and DVD
- Faroudja DCDi for incredibly sharp high quality video

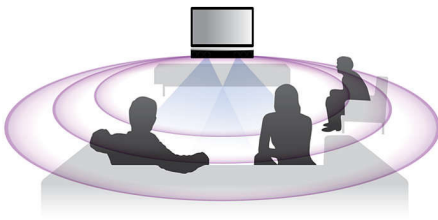

Superior listening experience

- Clear Voice for more audible vocals in movies and music
- Fullsound™ to bring your MP3 music to life
- DoubleBASS technology for fuller and deeper bass
- Ambisound technology for surround sound from fewer speakers

PHILIPS

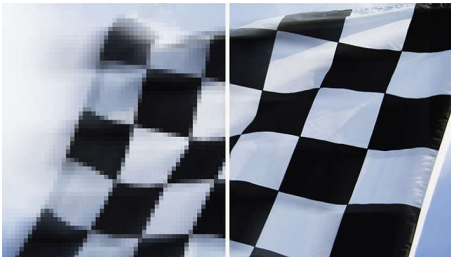

Highlights

Ambisound technology

Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

Faroudja DCDi

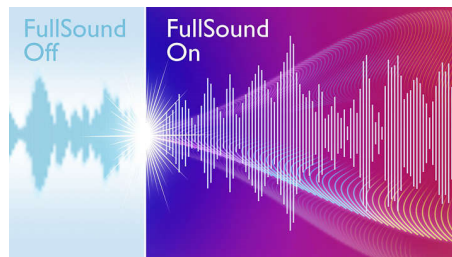

Enjoy incredibly sharp, high quality video on your progressive scan TV with Faroudja DCDi. The feature alleviates jagged edges that appear when standard interlaced video is viewed, especially with moving images - thus delivering natural-looking action scenes. Bring your viewing experience to the next level with clearer smoother pictures

DoubleBASS technology

DoubleBASS ensures you hear even the deepest bass tones from compact-sized subwoofers. It captures low frequencies and recreates them in the audible range of the subwoofer - delivering sound with more boom and panache, and ensuring you a full, uncompromised listening experience.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed

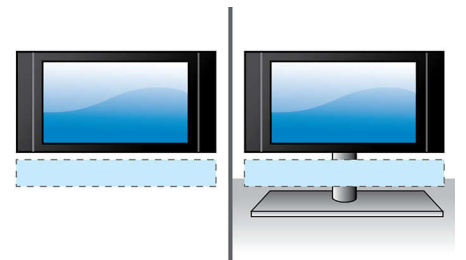

MP3 music in true-to-life sound that will touch your soul and move your feet.

Clear Voice

Critical moments in a conversation or inspiring lyrics to a song are too often missed. Rewinding the DVD disrupts the entertainment, whilst simply ignoring what was missed diminishes the enjoyment. Clear Voice is an innovative audio technology that significantly increases the intelligibility of vocalizations, whether spoken or sang. It ensures you hear every word - so you can enjoy what you're watching to the fullest.

Flexible placement

Enjoy the versatility of this home theater system that allows you to place it where you will. Whether on a TV stand, on a table or mounted on a wall, the product looks sensational and functions without compromise. For once, you get to control how your home looks without giving up an incredible home theater experience.

Specifications

Sound
