Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- Dolby Digital for ultimate movie experience
- Twin tweeters for optimum clarity performance
- External subwoofer adds thrill to the action

PHILIPS

Highlights

Bluetooth

Bluetooth is a short range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favorite music from any smartphone, tablet or laptop, including the iPod or iPhone with a Bluetooth-enabled speaker.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

External subwoofer

External subwoofer adds thrill to the action

Dolby Digital

Because Dolby Digital, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

USB

Enjoy MP3/WMA music directly from your portable USB devices

Low-rise profile

Low-rise profile for the perfect fit in front of your TV

Works with multiple devices

Works with TVs, BD/DVD players, gaming consoles, MP3 players

Ultra-compact soundbar

Ultra-compact 80cm-wide soundbar suits any home décor

Twin tweeters (HC 2012)

Twin tweeters for optimum clarity performance

Audio in

Audio in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player, or laptop via a simple connection to your home cinema. Simply connect your audio device to the Audio in jack to enjoy your music with the superior sound quality of the Philips home cinema system.
