Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- Dedicated center-channel speaker for superior voice clarity
- 2-way loudspeaker for the best clarity and dynamic range
- Dolby Digital and Pro Logic II surround sound

PHILIPS

Soundbar speaker

3.1 CH wireless subwoofer Google Cast & Spotify Connect, Bluetooth and NFC, 1 HDMI in & HDMI out ARC

Highlights

Center-channel speaker

A centre-channel speaker dedicated especially to voice frequencies anchor speech to the centre of the screen. This offers improved voice positioning and clarity, increasing immersion in movies.

Dolby Digital and Pro Logic II

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo

source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

One-touch with NFC

Pair Bluetooth® devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC enabled smartphone or tablet on the NFC area of a soundstage to turn the soundstage on, start Bluetooth® pairing, and begin streaming music.

One HDMI in available

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio one HDMI in output to the connection in your non-3D AV receiver.

EasyLink

EasyLink lets you control multiple devices like DVD players, Blu-ray players, soundbar speaker, Home theater and TV's etc. with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

HTL5160B/12
