3 Ring of the handle  
4 Power button  
5 Manual Select  
6 Automatic reheat  
7 Speed setting  
8 Foil  
9 Anti static grille  
10 Diffuser  
11 Mains plug

#### Dry your hair

When the dryer is plugged in without reaching out, it will automatically turn on. Instead, the dryer's handle must have some warmth after a while, which is why the auto heat function is available.

When the air is being blown over, on automatically and continuously dispersed, reducing frizz providing additional.

1 Connect the plug to a power supply socket.

2 Press the speed button for precise drying.

**Do not touch the accessory it is cold down.**

3 To enhance volume for curls and bouncy style, attach the diffuser and turn the diffuser into your hair to touch your scalp and make rotating movements.

4 Slide the power on/off button to ▲ Press and hold the button for ▲ to choose the temperature.

5 In preset mode, press the mode button to select your desired setting.

**Fast:** Dry shower wet hair quickly.

**Thermal:** Dry hair with an automatic control and air-flow.

**Gentle:** Dry hair with a more temperature for a gentle experience.

6 In Manual Select, you can press mode ▲ speed ▲ to switch momentarily to Fast.

7 Switch the power on/off button to ▲ and you will see COOL on display.

8 Press the speed button again to turn off the heat and dust, and use a toothbrush to gently clean the foam. Make sure to the foam back.

**Do not touch the foam under tap water.**

#### Troubleshooting

**Problem** **Cause** **Solution**

The appliance does not work at all.

The power socket to which the appliance is connected is not working.

The appliance may have overheated and switched itself off.

The hair dryer may not be suitable for the voltage to which it is connected.

The small error from the new appliance.

There is some dust or residue left in the hair dryer.

The hair dryer is not burning dry when drying my hair.

I hear annoying noise when using auto-dry mode.
