Advanced Visualization  
Workspace

Software subscription

# Unlock flexibility with Advanced Visualization Workspace

In today's dynamic healthcare environment, radiology departments require flexibility and scalability to keep up with changing clinical needs. Our Advanced Visualization Workspace as a subscription is designed to meet the need for flexibility in applications and number of users while offering easy access to the rich portfolio of Philips advanced visualization clinical applications. It's a turnkey solution that is responsive to your specific needs over time.

## Access AV/AI advances as they become available

Why wait to leverage the latest developments in advanced visualization? Delivered as a truly flexible subscription service, the multi-vendor Advanced Visualization Workspace provides valuable long-term support for the evolving needs of your healthcare organization. This approach is designed to help you scale your AV/AI\* capabilities to keep pace as clinical standards mature, your organization grows and the AI landscape expands.

## The need is clear and so is the answer

# +6%

yearly growth rate in  
total diagnostic imaging  
procedure volumes

is a typical goal for radiology practices between 2022 and 2026, driven by population growth, democratization of imaging and screening techniques, technological advancements and expanding service offerings.<sup>1</sup> Flexible software solutions can help accommodate this growth.

# 40%

of articles

over the past decade in the New England Journal of Medicine that tested standards of care resulted in modifications to clinical practice protocols.<sup>2</sup> A software solution needs to be able to keep up with evolving standards of care.

# 70+

applications with Advanced  
Visualization Workspace

Extend your clinical depth and coverage. Advanced Visualization Workspace is a comprehensive, scalable image post-processing platform that is designed for intelligent workflow automation. It spans multiple clinical domains, including oncology, cardiovascular, neurology and pulmonary with applications that offer flexibility to access, analyze and quantify patient data in one unified view.

# Experience a new level of flexibility and control as you enhance patient care

This auto-renewing subscription gives you usage rights to applications with flexibility to adapt to clinical demand. Scale up or down the applications and number of concurrent users as your needs change. Cancel without penalty.<sup>†</sup> It is always up to date and has full service support.

## Zero upfront investment\*\*

Avoid the hefty initial costs associated with traditional software purchases. Our subscription model allows you to access advanced visualization tools without the drawbacks of capital expense, such as the need to forecast ROI.

## Scalable and flexible

Easily add or remove users and applications. Our service adapts to your department's needs, growing with you as your demand increases or decreases.

## Stay current

Be sure your team is equipped with the latest technology. Subscription access includes automatic updates and upgrades at no additional cost.

## Simplify budgeting

Simplify budgeting and reduce financial planning complexity through predictable yearly payments. Opt for annual cancellation options to maintain financial flexibility.

## Dedicated support and training option

Benefit from continuous support and training for all users so that your team is proficient and can leverage the full capabilities of advanced visualization tools included for subscribed applications while upgraded/updated, anything beyond requires the purchase of professional services.

## Rich clinical depth and breadth

Advance your practice, as well as accommodate colleagues with new specializations, thanks to our comprehensive solution and access to the ever-evolving AI landscape.

## It's simple to get started

### 1. Choose your package

Select from our broad portfolio of clinical applications and subscribe to those that suit your specific needs.

### 2. Set up and go live

Our team will help you set up the software and train your staff.

### 3. Manage your subscription

Adjust your subscription as needed – change the number of concurrent users, add or change the applications you subscribe to, take advantage of the breadth of the Advanced Visualization Workspace portfolio to meet your changing needs.

## Find out more

To see what Advanced Visualization Workspace as a subscription can do for you, please contact your Philips representative to schedule a demo or visit <https://www.philips.com/Advanced-Visualization>

\*Philips clinical applications portfolio also includes Philips AI Manager, which can be offered as a subscription. Philips AI Manager is not intended for data interpretation or diagnosis. Availability of third-party algorithms may vary per market. The functionalities and benefits of the solution depend on customer-specific configuration and use. Please contact your local Philips representative for market availability. For AI applications offered by our partners, Philips facilitates the transaction as an agent.

† The option to cancel without penalty is available with the premium service.

\*\* When deployed virtually. There is an upfront charge for any physical hardware and professional services.
